

# Cable protection conduit and fitting systems

## Conversion from the Pg to the metric system

### General

Conversion from Pg to metric essentially concerns the connecting threads. Flexible conduits (cable protection conduits) are not affected, as the manufacturer prescribes the outside diameter according to EN 50086, parts 2 and 3, whereby the existing standard dimensions can be retained.

### Why convert?

The Pg thread system (Pg stands for the German words for heavy-gauge conduit thread), which has been standardised since 1926, has had its time! Safety standard VDE0619, with the DIN46319 standard for metric dimensions and DIN46320 standard for Pg dimensions cited in it, was withdrawn on 31.12.1999. The new DIN EN 50262 standard entered into force on 01.01.2000. It offers users throughout Europe a uniform connecting thread. The new standard determines the new metric sizes and lays down new safety requirements. No specifications are given for widths across corners, widths across flats etc.

### Consequences of conversion

The Pg thread was permitted for use in the transition period up to 01.03.2001. Since that date, the use of Pg fittings in new developments should be dispensed with, as there will be no declaration of conformity and no CE or VDE marking is possible. Pg threads may still be used for replacement purposes.

### What does that mean for our customers?

As we manufacture screwed fittings and deliver them all over the world, we will continue to offer fittings with Pg, NPT and metric threads for the time being. This means that you, as the customer, will still be able to supply your end customers with Pg systems where necessary.

## Murrflex cable protection conduit and fitting systems

Murrplastik Systemtechnik GmbH has been developing and manufacturing cable protection conduit and fitting systems for over 20 years.

Right from the beginning priority was given to a systematic approach. That is still the case today.

The last few years have seen increasing demands as regards sturdiness, strength, flexibility, ease of assembly, protection class, diversity and high availability placed on conduits and screw fittings. Developing these necessary parts and supplying them to the market has been and continues to be a challenge for Murrplastik.

The latest example is the new m-top family of fittings, which offers a large number of variants with a high protection class and is supplied ready to assemble with integrated seals and pre-assembled cap nut. This permits very rapid assembly and gives the customer the maximum possible process reliability when installing parts.

A further example are the cable protection conduits from Murrplastik Systemtechnik GmbH.

Consistent enhancements have yielded outstanding results through new forms and new material variants that offer our customers enormous advantages.

The EWX family of cable protection conduits have brought considerable benefits thanks to their special form alone. Much sturdier than standard conduits, they are also more flexible even though the material is the same. Even though the conduit is slit, it remains almost fully closed. This enables pre-assembled cables to be installed at any time without any great expense. The EWX conduit is made from tried-and-tested materials.

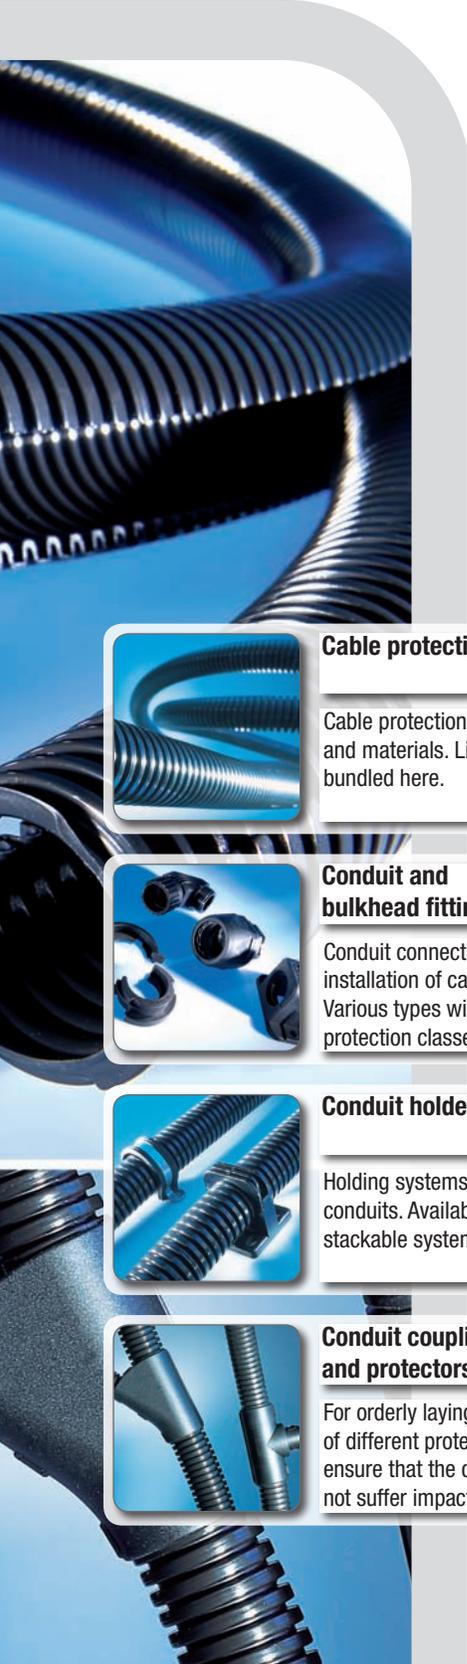

Murrplastik has developed a new material specifically for dynamic applications, e.g. in robotics, that enables the service life for this extreme environment to be lengthened many times over. That reduces maintenance costs.

**Our motto:**  
**The product must offer definite application advantage to the customer**

## Product range

**Cable protection conduit Murrflex**

Cable protection conduits in various variants and materials. Lines can be protected or bundled here.

Page 38

**Conduit and bulkhead fittings**

Conduit connections for safe and quick installation of cable protection conduits. Various types with different protection classes.

Page 84

**Conduit holders**

Holding systems for fitting cable protection conduits. Available as single holders and as a stackable system.

Page 166

**Conduit couplings, conduit distributors and protectors**

For orderly laying/branching of cable looms of different protection classes. The protectors ensure that the cable protection conduits do not suffer impact and abrasion.

Page 180

**Cable fittings**

Fittings made of plastic and metal, also for EMV and EX applications. Multi-inserts increase versatility.

Page 190

**Accessories**

Lock nuts, dummy plugs, thread reducers, thread expanders, O-Rings, angle brackets, conduit clamps and much more.

Page 204

**Tools**

Tools for the safe and efficient installation of electrics e.g. cable stripping knives, stripping tongs and cable tie tools.

Page 234

**Punching tools**

For the creation of perfect round and corner cut-outs in steel and stainless steel. Special shapes for SUB-MIN-D plug etc. are available.

## General information

### **Materials**

The use and combination of a wide variety of materials, e.g. plastics of all kinds, elastomers or metals, means that Murrplastik's end products can be used in an infinite number of ways.

### **Forms**

Different forms, e.g. of cable protection conduits, also bring with them changes in properties. The standard corrugation of type EW cable protection conduits, for instance, offers excellent properties with regard to flexibility, crush resistance and flexural fatigue strength.

The high corrugation of type EWX cable protection conduits offers further improvements in certain properties. Crush resistance in particular is greatly enhanced. Flexibility is also significantly improved.

### **Crush resistance**

Crush resistance refers to the mechanical resistance of cable protection conduits. The value relates to the given dimension of a cable protection conduit.

### **Fire behaviour**

The use of self-extinguishing materials and material variants enables applicability of plastics in critical areas. The products or the raw material are normally certified and classified according to UL 94 or DIN 5510. See also "FIRE CLASSIFICATIONS" in the APPENDIX.

### **Approvals**

Our products boast a large number of approvals and certifications, e.g. VDE, UL/UR, CSA, DB, SNCF, BS,... Note the specifications in the catalogue and product data sheets.

### **Chemical properties**

Reactions with chemical substances differ according to the individual plastics and elastomers. For more information, see "CHEMICAL RESISTANCES" in the APPENDIX.

A large database with more than 1800 chemical substances can be accessed on the internet at [www.murrplastik.de](http://www.murrplastik.de).

### **Temperatures specifications**

The temperature ranges quoted for the individual products must be noted in application. "SHORT PERIODS" refers to a total duration of up to 500 hours. Thereafter, the properties of the plastics may change.

### **IP protection class**

The IP protection class indicates the tightness of products against solids and water. The values are also related to static applications. With dynamic applications, the protection class may change. For more information, see "PROTECTION CLASSES" in the APPENDIX.

### **Static/dynamic applications**

*Static applications are:*

cables that are laid permanently and are not therefore exposed to persistent movement. Examples include permanently routed motor cables.

*Dynamic applications are:*

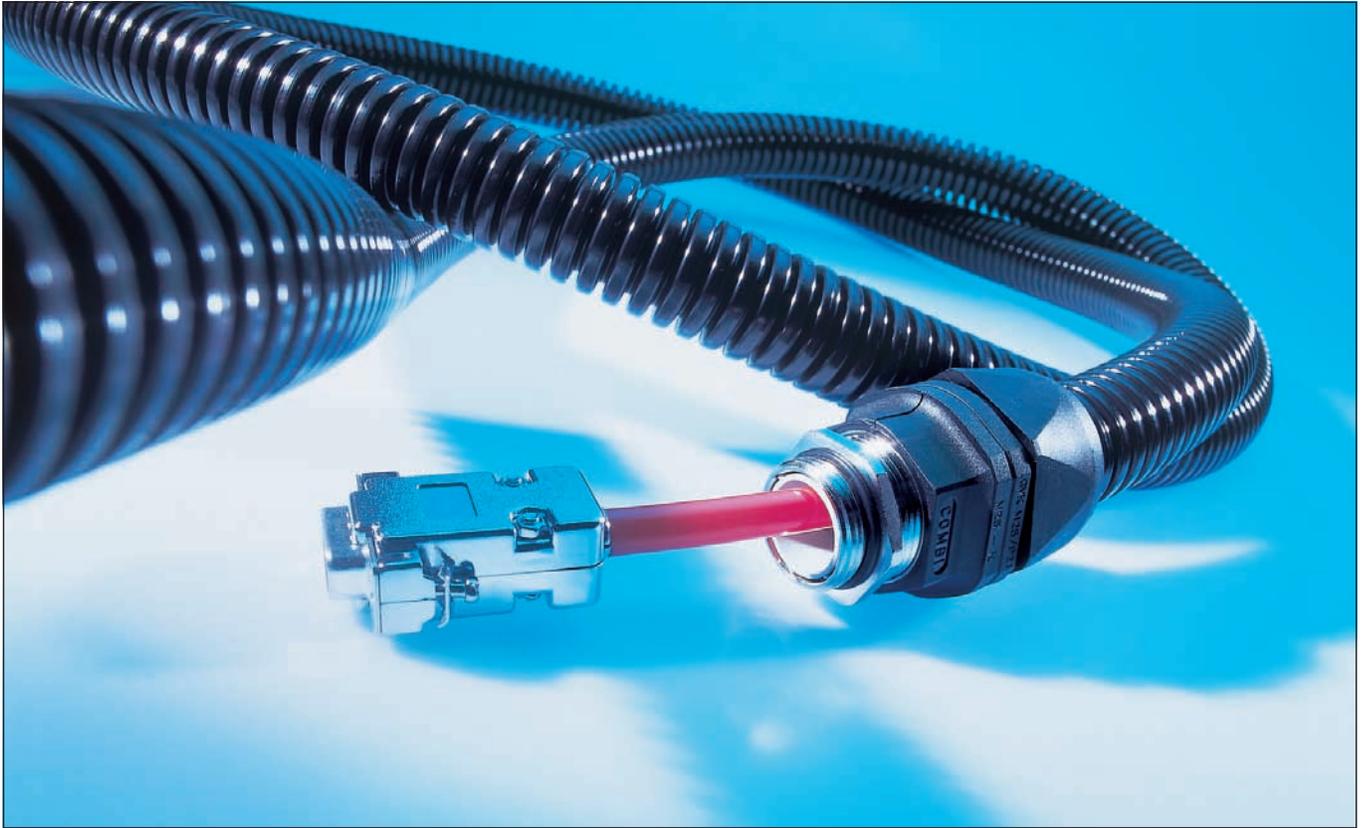

cables that are exposed to persistent movement. Examples include robot applications or controlled axes as well as applications producing a high frequency of flexural stresses for cables and cable protection conduits.

## Cable protection conduit Murrflex

## Advantages

## Protecting and bundling cables

Cable protection conduits can be used to protect cables against dirt and moisture. They also offer mechanical protection and are suitable for bundling cables.

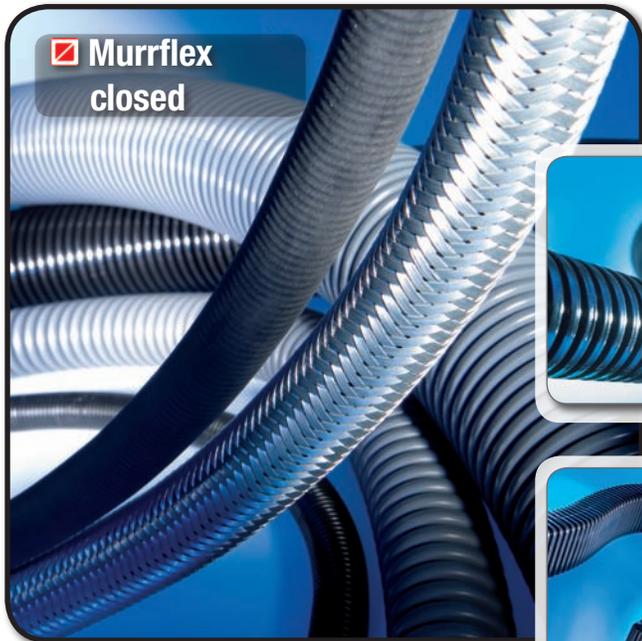

A large range of cable protection conduits, from those laid statically to those subject to extreme dynamic stresses, covers almost all requirements.

A large number of our conduits are certified and approved, e.g. to DIN5510, UL, CSA, NF F 16-101...

- ✓ Wide range of possible uses
- ✓ Many approvals/certificates
- ✓ Variety of profiles
- ✓ High quality

## Murrflex product range

### Standard cable protection conduits Murrflex

Round cable protection conduits for plant construction, mechanical engineering, control cabinet construction, vehicle construction and railway engineering.

Page 38

### Special cable protection conduits Murrflex

Specially shaped cable protection conduits with particular properties, suited for special areas of application.

Page 51

### One-piece cable protection conduits Murrflex

Slitted cable protection conduits in a range of versions and materials. Lines can be protected or bundled later.

Page 67

### Multi-piece cable protection conduit Murrflex Split-Flex

Two-piece cable protection conduits in a range of versions and materials. Ideal for repairing existing systems.

✓ combinable

X not combinable

\* combinable where extraction forces are low

•• combinable to an extent (remove sheathing)

\* in connection with an additional conduit or cable fitting

# Cable protection conduit Murrflex closed

## Type EW / EWX (high corrugation)

RoHS  
compliant

-40 to 194 °F  
transient 248 °F

Mod. polyethylene

HB

EW: > 11.43 lb<sub>f</sub>/inch  
EWX: > 22.86 lb<sub>f</sub>/inch

Suitable fittings:  
m-top, -tec, -fix, -jumbo, KFW, AT

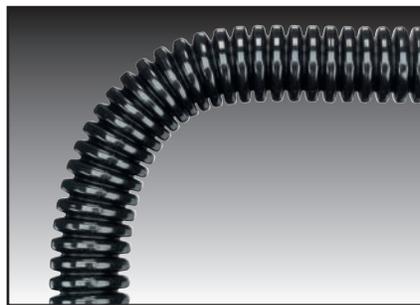

Universal cable protection conduit for light mechanical stresses or bundling cables with excellent flexibility.

Applications:

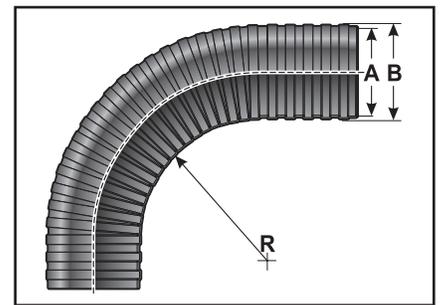

- Plant engineering
- Mechanical engineering
- Control cabinet construction

## Type EW-PA-UL / EWX-PA-UL (high corrugation)

RoHS  
compliant

-  -40 to 284 °F  
transient 320 °F
-  Mod. polyamide 6
-  V0  
Self-extinguishing
-  EW-PA-UL: > 74.30 lb<sub>f</sub>/inch  
EWX-PA-UL: > 3.800 lb<sub>f</sub>/inch
-  Suitable fittings:  
m-top, -tec, -fix, -jumbo, KFW, AT

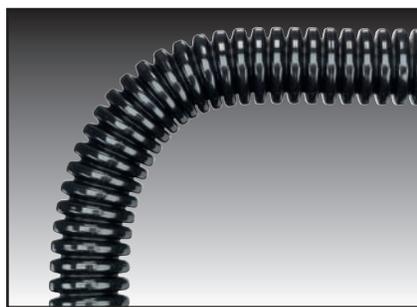

Self-extinguishing UR-listed cable protection conduit with extremely high mechanical strength yet excellent flexibility. This cable protection conduit is notable for its extreme angle consistency. That makes it suitable for use wherever cables require heavy-duty mechanical protection. A real alternative to expensively installed metal conduits.

Applications:

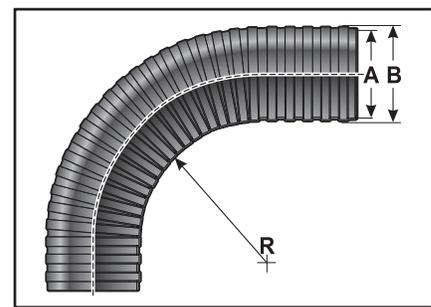

- Plant engineering
- Mining
- Vehicle engineering
- Mechanical engineering
- Railway engineering

\* Narrow corrugation

## Type EW-PAE / EWX-PAE (high corrugation)

RoHS  
compliant

-  -40 to 248 °F  
transient 302 °F
-  Mod. polyamide 12
-  HB
-  EW-PAE: > 22.86 lb<sub>f</sub>/inch  
EWX-PAE: > 28.56 lb<sub>f</sub>/inch
-  Suitable fittings:  
m-top, -tec, -fix, -jumbo, KFW, AT

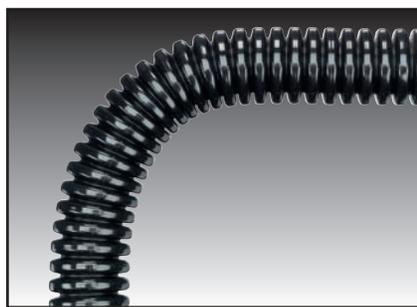

This cable protection conduit was developed specially for robot applications subject to extreme movements. Extremely small bending radii with extremely high flexibility and extreme flexural fatigue strength. It is also highly resistant to abrasion with low weight.

Applications:

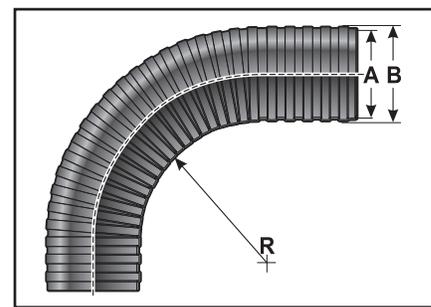

- Robots
- Handling systems
- In cable drag chains

## Type EW-PA-EX

RoHS  
compliant

-40 to 230 °F  
transient 302 °F

Mod. polyamide 12

HB

> 20.00 lb./inch

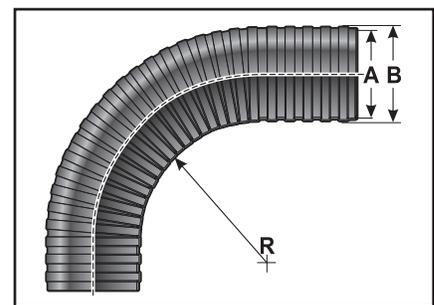

Suitable fittings:  
m-top, -tec, -fix, -jumbo; KFW; AT

Conductive plastic conduit made from polyamide 12 for applications in areas at risk of explosion. This cable protection conduit meets the requirements of ATEX Directive 94/9/EC. Suitable for static and dynamic applications.

Applications:

- Mining
- Refineries
- Chemical industry
- Robots

## Type EW-PAP (with metal braiding)

-  -40 to 284 °F  
transient 320 °F
-  Mod. polyamide 6  
Galvanized steel wire
-  HB
-  > 45.72 lb<sub>f</sub>/inch
-  Suitable fittings:  
EH-EMV

Cable protection conduit with sheathed metal braiding for high mechanical protection. Particularly suitable for EMC applications and applications where cables must be protected against hot solids (e.g. chippings).

Applications:

- EMC applications
- In areas exposed to hot chippings
- In welding areas

Suitable EH-EMV fitting, see "Special fittings" chapter

## Type EF (rectangular conduit)

RoHS  
compliant

 -58 to 320 °F  
transient 356 °F

 Thermoplastic elastomer

 HB

 > 17.15 lb./inch

 Suitable fittings:  
EF/B

Rectangular cable protection conduit for medium mechanical stresses and maximum flexibility. The 3 yard long cable protection conduits are ideal as a cost-effective alternative to cable drag chains.

Applications:

- Handling systems
- Plant engineering
- Controlled axes
- Robots

# Cable protection conduit

## Murrflex closed

### Type GF (braided conduit)

- 58 to 302 °F  
transient 347 °F
- Mod. polyamide 6
- Self-extinguishing

Single wires and cables can be bundled together easily during assembly by pressing together the braided conduit.

- Saves space
  - high abrasion resistance
- Applications:
- Mechanical engineering
  - Plant engineering
  - Vehicle engineering

## System overview

# Cable protection conduit

## Murrflex open

### One-piece cable protection conduits Murrflex

#### Type EW-LS EWX-LS (high corrugation)

Universal cable protection conduit for light mechanical stresses. The longitudinal slit enables laying of pre-assembled cables as well as repairs to existing systems.

Page 66

-40 – 194 °F short periods 248 °F

Polyethylene

Fire classification HB

EW-LS: > 11.43 lb./inch  
EWX-LS: > 22.86 lb./inch

#### Type EW-PA-LS EWX-PA-LS (high corrugation)

Universal cable protection conduit for medium to high mechanical stress. The longitudinal slit enables the laying of pre-assembled cables.

Page 67

-40 – 284 °F short periods 320 °F

Polyamide PA6

Fire classification HB

EW-LS: > 40.00 lb./inch  
EWX-LS: > 74.30 lb./inch

#### Type EWX-PAE-LS (high corrugation)

Specially design for robot applications: For eXtremely small bending radii with eXtremely high flexibility and eXtreme flexural fatigue strength. It is also highly resistant to abrasion with low weight.

Page 68

-40 – 248 °F short periods 302 °F

Polyamide PA12

Fire classification HB

> 28.56 lb./inch

### Multi-piece cable protection conduits Murrflex Split-Flex

#### Type EWT-PP Split-Flex

Two-piece, slitted cable protection conduit made of polyamide with high mechanical strength. For the installation of pre-assembled cables or for later installations.

Page 69

-40 – 284 °F short periods 320 °F

Polyamide PA6

Fire classification HB

> 68.58 lb./inch

#### Type EWT-PP Split-Flex

Two-section polypropylene slit cable protection conduit with average mechanical strength and good chemical stability.

Page 70

# Murrflex cable protection conduit open

## Type EWX-PAE-LS (high corrugation)

RoHS compliant

-  -40 to 248 °F  
transient 302 °F
-  Mod. polyamide 12
-  HB
-  > 28.56 lb<sub>f</sub> /inch
-  Suitable fittings:  
m-top, -tec, -fix, KFW, AT

This cable protection conduit was developed specially for robot applications subject to extreme movements. Extremely small bending radii with extremely high flexibility and extreme flexural fatigue strength. It is also highly resistant to abrasion with low weight. The longitudinal slot enables pre-assembled cables to be easily fitted and existing systems to be repaired.

- Applications:
- Robots
  - Handling systems
  - In cable drag chains

**Conduit fitting**  
**Bulkhead fitting**

## Conduit and bulkhead fittings

Your cables are bound together with Murrplastik cable protection conduits and are secured against damage and environmental impact occurring to the control cabinet of the machine.

Now it is imperative that the safety chain is inserted into the housing very carefully.

This task is easily fulfilled by Murrplastik conduit connections and fittings exactly according to your requirements.

Our extensive range includes everything from simple conduit connections with protection class IP 54 through to highly dense, tear-out proof conduit fittings of class IP 68 or IP 69K.

The compatibility of conduits, fittings and flange connections emphasises the system idea, as with all Murrplastik product ranges.

Well-thought out design and quick, simple or even tool-less assembly are the characteristics of our products.

- No loose piece that can get lost, everything is pre-assembled and ready to install.
- Integrated vibration protection in the form of a latch prevents unintended loosening of the cap nut and increase process safety during assembly and when in use.
- Burrless and edgeless inner bends enable efficient work even with 90° angled fittings.
- Simple locking mechanisms make retrofits and/or maintenance to existing systems easy.
- Connection threads made of metal and plastic fitted with metric, Pg or NPT threads, greatly increase the application of your products all over the world.

**Our conduit fitting system gives you great advantages: less working time and more process safety through the use of innovative Murrplastik products**

## Conduit and bulkhead fittings product range

**Conduit connection bulkhead fittings**

90° conduit connection. The large opening allows easy insertion of pre-assembled conduits.

Page 142

**m-jumbo conduit fittings**

Conduit connections for large cable protection conduits NW 70 and NW 95. The cable protection conduit remains rotatable in the fitting.

Page 150

**m-top conduit fitting**

Protection class IP 68. The variety of types with different thread types ensures almost any use.

Page 84

**m-tec conduit fitting**

Protection class IP 65. A conduit fitting in various models with different thread types.

Page 110

**m-fix conduit fittings**

Protection class IP 54/65. m-fix is a quick-plug-in fitting. Simply stick in the conduit. That's all there is to it!

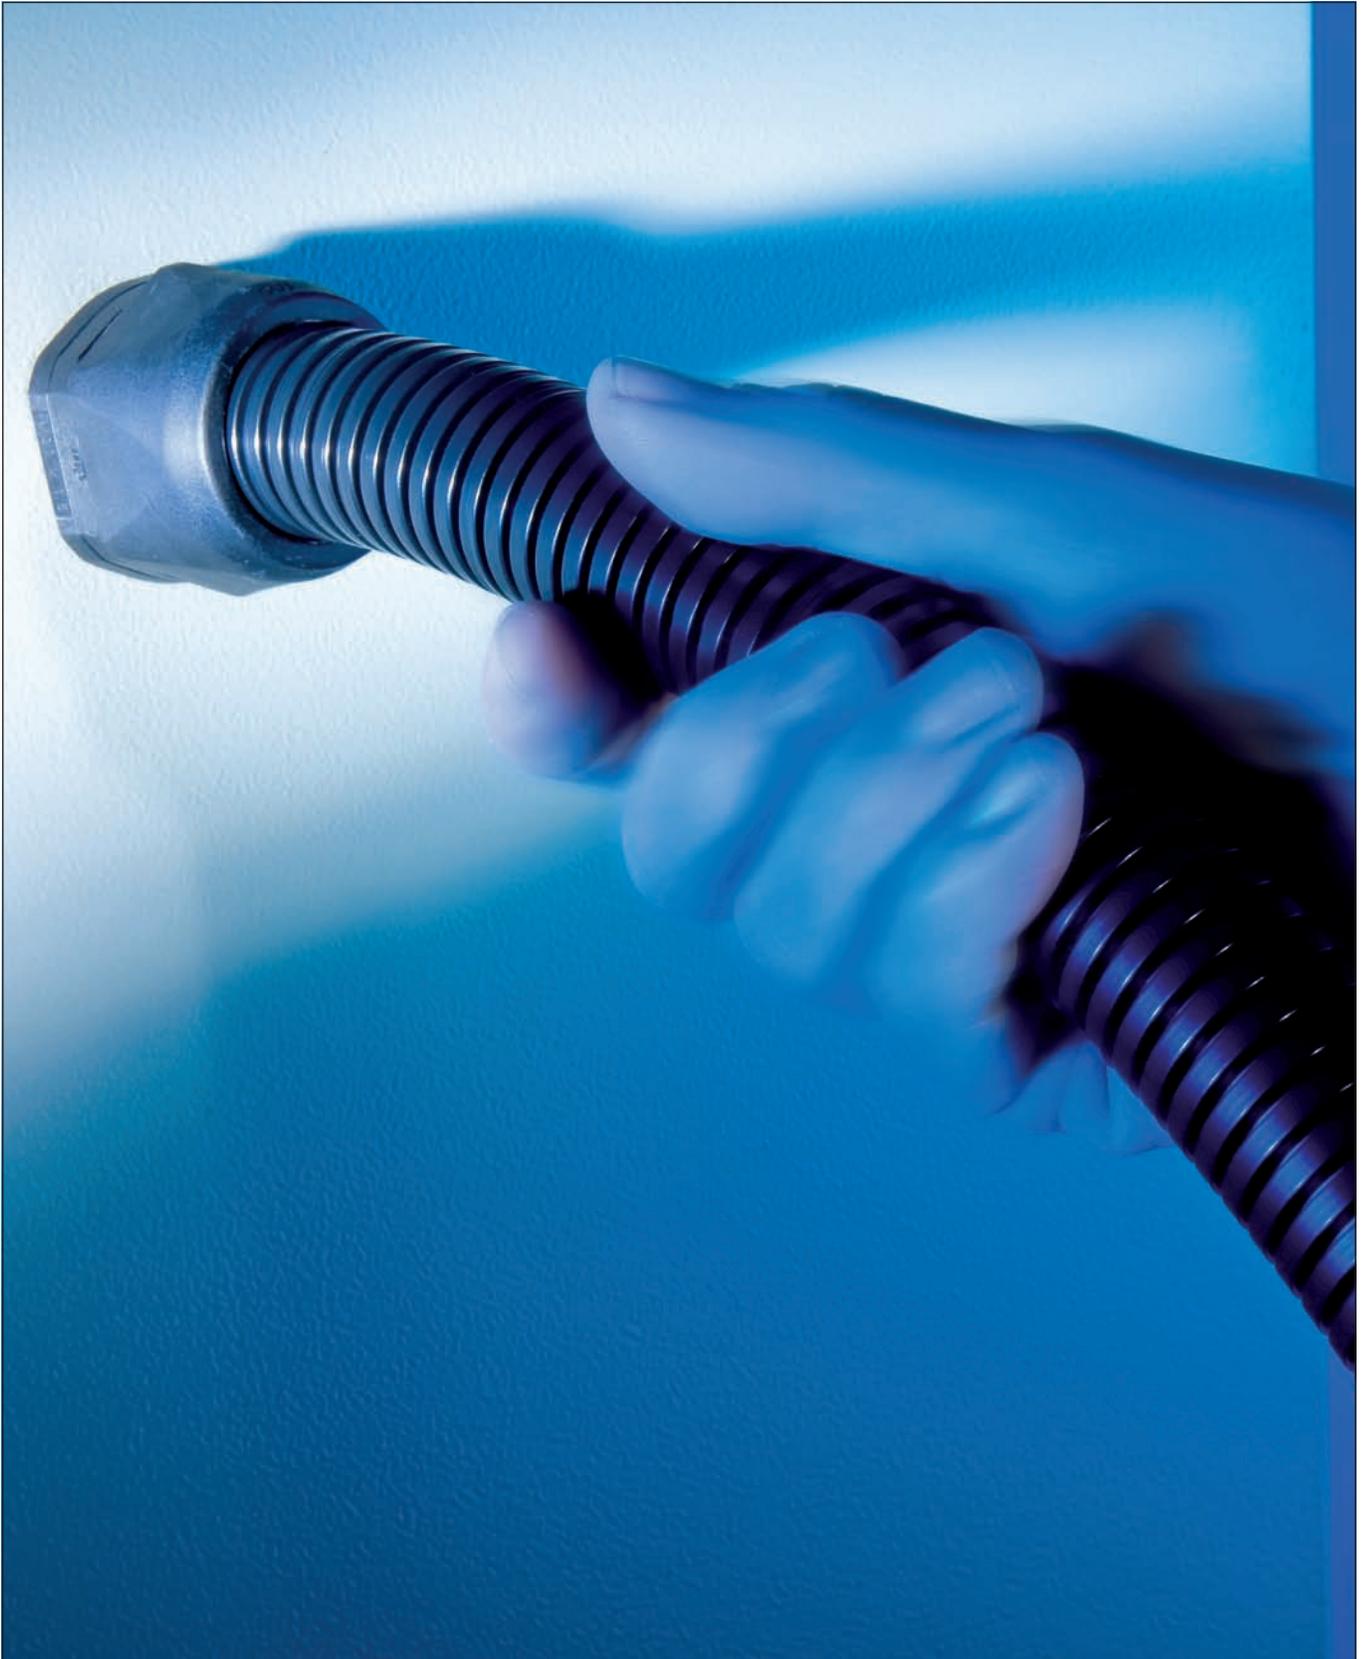

Page 130

**Special fitting**

Special fitting for the connection of standard and special conduits.

Page 160

## m-top conduit fitting

## Advantages

## High protection class

The m-top family consists of conduit fittings manufactured from high-grade polyamide. Their design means that the fittings offer a high protection rating of IP 68 or IP 69K.

The fittings are completely pre-assembled and no additional parts such as cap nuts, gaskets, conduit seals etc. need to be fitted. This ensures the greatest possible process reliability in assembly.

The cable protection conduit can be assembled quickly and easily by simply inserting the conduit and turning the cap nut. The nut engages in the body, preventing unintentional opening. As the inside bends in the fittings have no edges, the introduction of cables through 45° and 90° fittings does not present any problem.

- ✓ High protection class
- ✓ One-piece fitting
- ✓ Quick assembly

## Large variety

Thanks to its large range, the m-top family of fittings has the perfect solution for practically every requirement.

Thanks to its construction, the fitting has a very high tear-out strength.

The fitting is available in straight versions and 45° and 90° angled versions. The connection thread is available in metal and plastic and in metric, Pg or NPT versions.

Due to its listing with the Underwriters Laboratories (UL) and the Canadian Standards Association (CSA), the fitting m-top has been approved for the north American market.

In addition to this they are also approved by the German, British and French national railway companies.

- ✓ Huge variety of types
- ✓ High tear-out strength
- ✓ Optimal process safety

## Type VG (plastic thread)

RoHS compliant

-40 to 230 °F  
transient 284 °F

Mod. polyamide

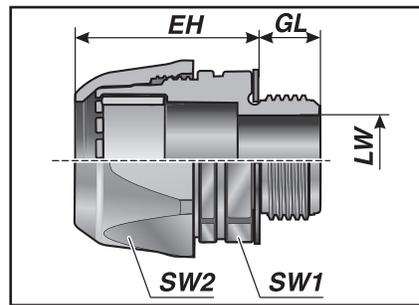

VO

IP 68 to 6 bar (IP 69K)

Straight conduit fitting with plastic thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

IP68

## Type IVG (metal internal thread)

RoHS compliant

IP68

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
Brass, nickel-plated

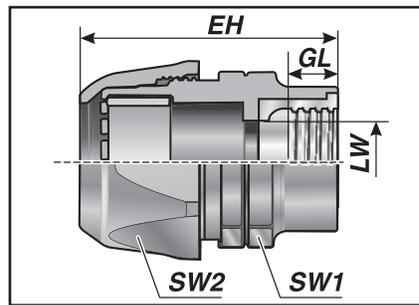

VO

IP 68 to 6 bar (IP 69K)

Straight conduit fitting with metal internal thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

IVG

## Type CVG EMV (conduit and cable fitting; metal thread)

IP68

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
Brass, nickel-plated

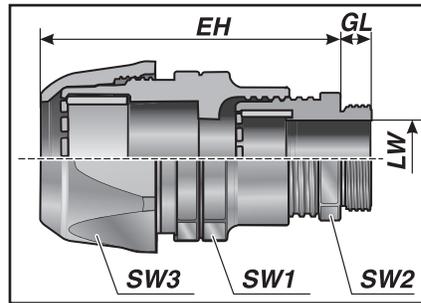

V0

IP 68 to 6 bar (IP 69K)

Combined conduit and cable fitting, straight, with metal thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

## Type VW 45° (metal thread)

RoHS  
compliant

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Brass, nickel-plated
-  V0
-  IP 68 to 6 bar (IP 69K)

Angled conduit fitting with metal thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

IP68

## Type CVW 45° EMV (conduit and cable fitting; metal thread)

RoHS compliant

IP68

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
Brass, nickel-plated

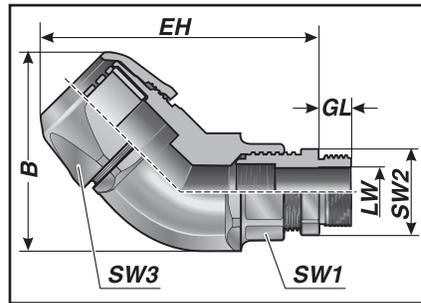

V0

IP 68 to 6 bar (IP 69K)

Angled conduit and cable fitting with metal thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

## Type DVW 45° (360° rotatable conduit fitting; metal thread)

RoHS  
compliant

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Brass, nickel-plated
-  V0
-  IP 68 to 6 bar (IP 69K)

Rotatable, angled conduit fitting with metal thread. Following installation, the fitting can be turned into a desired position.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

## Type CVW 90° EMV (conduit and cable fitting; metal thread)

RoHS  
compliant

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Brass, nickel-plated
-  V0
-  IP 68 to 6 bar (IP 69K)

Angled conduit and cable fitting in EMC version with metal thread.

- Insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- Inner bend without edges. This makes insertion of the cable easier.
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

IP68

## Type DVW 90° (360° rotatable conduit fitting; metal thread)

IP68

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
Brass, nickel-plated

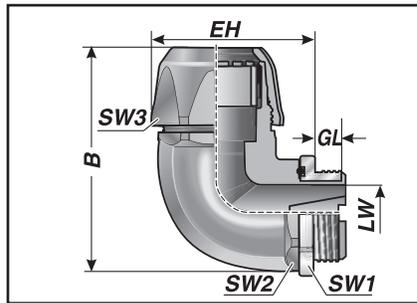

VO

IP 68 to 6 bar (IP 69K)

Rotatable, angled conduit fitting with metal thread. Following installation, the fitting can be turned into a desired position.

- Easy assembly = insert conduit → screw upper part tight → ready
- Reliable assembly because fitting is supplied pre-assembled.  
No additional parts required
- Resistant to vibration due to lockable cap nut
- Clamping along entire circumference ensuring maximum tear-out strength
- Can be opened without tools
- High sealant properties corresponding to IP 68 to 6 bar (IP 69K) without additional parts
- Simple check that the conduit is assembled correctly

**m-tec conduit fitting**

## Advantages

## Universal

The m-tec family consists of conduit fittings manufactured from high-grade polyamide.

Thanks to their construction, the fitting provides a high protection class of IP 65. The fittings are completely pre-assembled and no parts such as lockable cap nuts and clamping rings have to be fitted retrospectively. This ensures the greatest possible process reliability in assembly.

The cable protection conduit can be assembled quickly and easily by simply inserting the conduit and turning the cap nut.

As the inner bends have no sharp edges, the introduction of cables through 90° fittings does not present any problems.

- ✓ High protection class IP 65
- ✓ One-piece fitting
- ✓ Quick assembly
- ✓ High tear-out strength
- ✓ Inner contours rounded for 90° variants

## Type CSKV (conduit and cable fitting)

RoHS  
compliant

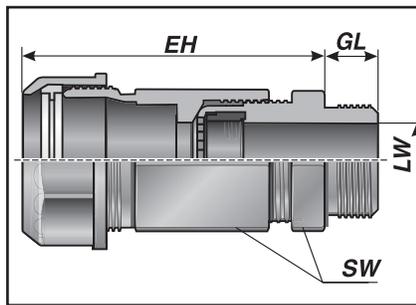

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Moulded seal: Buna N
-  V0
-  IP 65

Combined 2-in-1 conduit and cable fitting.

The CSKV is a combination of our proven WKK cable fitting and the EH conduit fitting.

- Clamping along entire circumference ensuring maximum tear-out strength
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- High protection class IP 65 without additional parts

IP65

## Type MCSKV (conduit and cable fitting)

RoHS  
compliant

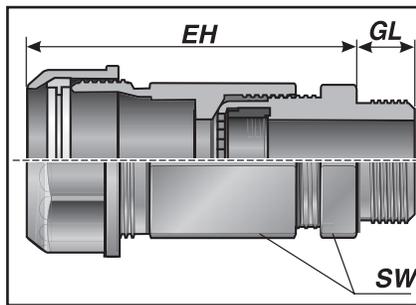

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Moulded seal: Buna N
-  V0
-  IP 65

Combined conduit and cable fitting 2-in-1 with multi-insert.

The MCSKV is a combination of our proven MWKK multi cable fitting and the m-tec EH.

- Clamping along entire circumference ensuring maximum tear-out strength
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- High protection class IP 65 without additional parts
- Several cables can be inserted at the same time

## Type ECSKV (conduit and cable fitting)

RoHS  
compliant

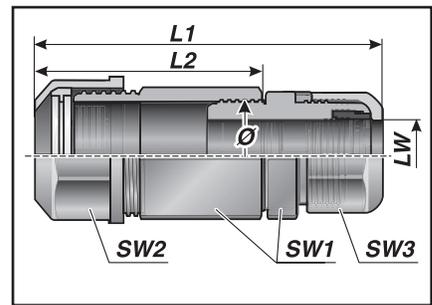

-  -40 to 230 °F  
transient 284 °F
-  Mod. polyamide  
Moulded seal: Buna N
-  V0
-  IP 65

Combined 2-in-1 conduit and cable fitting.

The ECSKV is a combination of our proven WKK cable fitting and the m-tec EH conduit fitting.

- Clamping along entire circumference ensuring maximum tear-out strength
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- High protection class IP 65 without additional parts
- Optimal fixing with the angle bracket BWM

IP65

RoHS  
compliant

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
Moulded seal: Buna N

V0

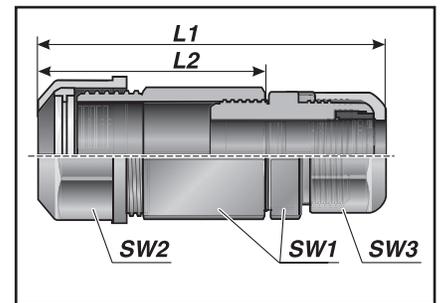

IP 65

Combined conduit and cable fitting 2-in-1 with multi-insert.

The MECSKV is a combination of our proven MWKK multi cable fitting and the m-tec EH.

- Clamping along entire circumference ensuring maximum tear-out strength
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- Several cables can be inserted at the same time
- Optimal fixing with the angle bracket BWM

## Type KW 90° (conduit fitting)

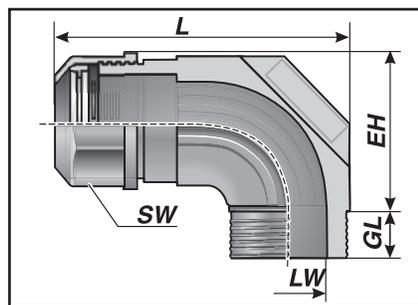

RoHS  
compliant

90° angled conduit fitting with plastic thread.

- Reliable assembly because fitting is supplied pre-assembled.
- No additional parts required
- Integrated clamping ring ensures high tear-out strength
- High protection class IP 65 without additional parts
- Can be opened without tools
- The inner bend is rounded. Therefore easy insertion of the cables into the 90° angle

IP65

KW 90°

- Clamping along entire circumference ensuring maximum tear-out strength
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- High protection class IP 65 without additional parts
- Folding angle piece makes cable assembly easy

The connecting angle piece can also be obtained separately. See accessories, type KAW.

IP65

## m-fix conduit fittings

## Advantages

### Easy to connect

The m-fix family consists of conduit fittings manufactured from high-grade polyamide. Their design means that the fittings offer a high protection rating of IP 54.

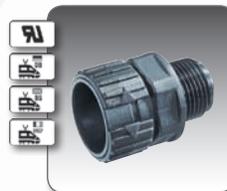

The fittings are completely pre-assembled and no additional parts need to be assembled. This ensures the greatest possible process reliability in assembly. The protection rating can be increased to IP 65 where required by the use of an additional sealing ring.

The cable protection conduit can be assembled quickly and easily by simply inserting the conduit into the fitting. The clamping ring closes automatically. As the inner bends have no sharp edges, the introduction of cables through 90° fittings does not present any problems.

- ✓ Easy push-on connector
- ✓ Very quick assembly
- ✓ High packing density
- ✓ One-piece fitting
- ✓ Inner contours rounded for 90° variants

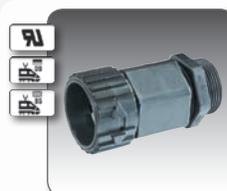

## m-fix series product range

### **Type MSV** **(push-on connector, plastic thread)**

Metric ISO thread (M)  
PG thread (Pg)  
National Pipe Taper (NPT)

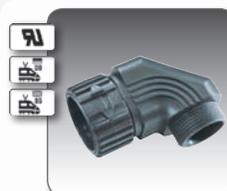

Page 130

### **Type KSV (conduit and** **cable fitting, plastic thread)**

Metric ISO thread (M)  
PG thread (Pg)  
National Pipe Taper (NPT)

Page 132

### **Type WSV 90° (angle push-on** **connector, plastic thread)**

PG thread (Pg)

Page 134

### **Type DR-NBR (sealing ring)**

The sealing ring DR-NBR enables the protection rating on conduit fittings MSV, WSV and KSV to be increased from IP 54 to IP 65.

## Type MSV (plug-in fitting)

RoHS compliant

-40 to 230 °F  
transient 284 °F

Mod. polyamide; POM

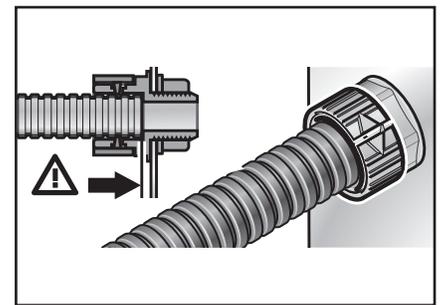

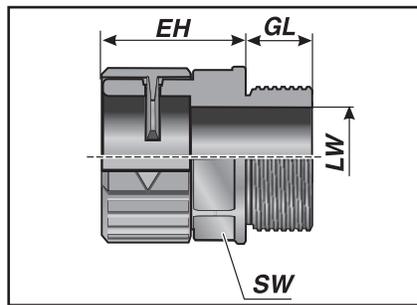

V1

IP 54  
IP 65 with sealing ring DR-NBR

- Cost reduction through simplification of assembly work insert conduit → ready
- Extremely high packing density due to small installation dimensions
- Simple opening mechanism
- Can be opened without tool
- Protection rating IP 65 with additional sealing ring (type DR-NBR)
- Cable protection conduit can still be rotated in the fitting

Sealing ring for protection rating of IP 65, see under type DR-NBR in this chapter

IP54

RA

## Type KSV (conduit and cable fitting)

RoHS  
compliant

-40 to 230 °F  
transient 284 °F

Mod. polyamide; POM  
Moulded seal: Buna N

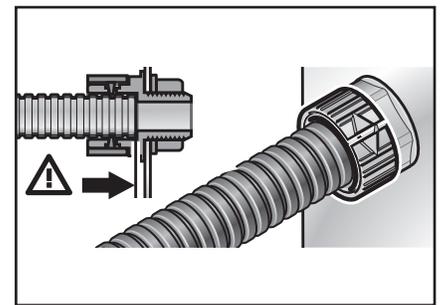

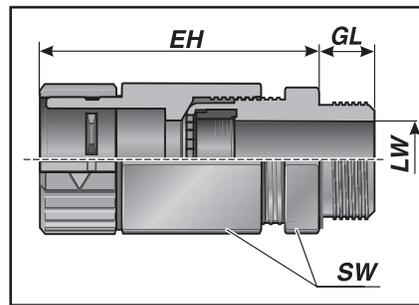

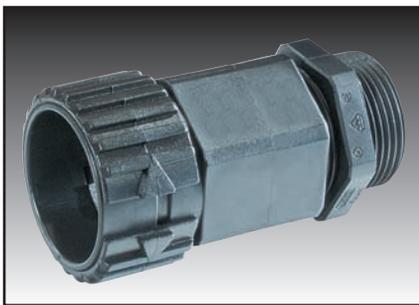

V1

IP 54  
IP 65 with sealing ring DR-NBR

The KSV is a combination of our proven WKK cable fitting and the m-fix MSV conduit fitting.

- Costs are reduced thanks to easy conduit assembly = insert conduit → ready
- Optimum strain relief for the cable due to iris-shaped lamellae
- No parts can get lost as the fitting does not have to be dismantled for assembly
- Protection rating IP 65 with additional sealing ring (type DR-NBR)
- Cable protection conduit can still be rotated in the fitting

Sealing ring for protection rating of IP 65, see under type DR-NBR in this chapter

IP54

## Type WSV 90° (angle plug-in fitting)

RoHS compliant

-40 to 230 °F  
transient 284 °F

Mod. polyamide  
POM

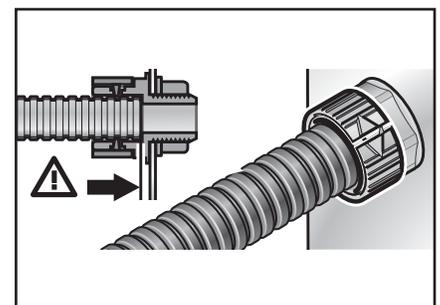

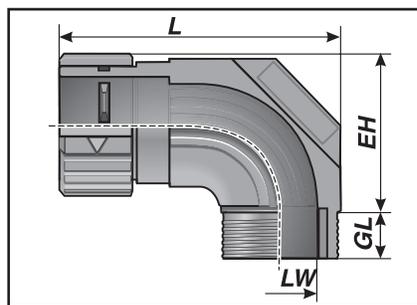

V1

IP 54  
IP 65 with sealing ring DR-NBR

- Cost reduction through simplification of assembly work insert conduit → ready
- Extremely high packing density due to small installation dimensions
- Simple opening mechanism
- The interior is rounded, allowing easy insertion of the cable into the 90° angle
- Can be opened without tools
- Protection rating IP 65 with additional sealing ring (type DR-NBR)
- Cable protection conduit can still be rotated in the fitting

Sealing ring for protection rating of IP 65, see under type DR-NBR in this chapter

IP54

## Conduit connection bulkhead fittings

## Advantages

### Split connection

The conduit connection bulkhead fittings are manufactured from high-grade polyamide.

As the bulkhead fittings are split and have a large cut-out size, pre-assembled cables can be easily and quickly inserted into a housing. Their design means that these bulkhead fittings offer a protection rating of IP54 or IP65.

Cable protection conduits can be assembled directly. The cable protection conduits remain rotatable. The higher IP 65 protection rating is achieved in combination with a suitable conduit fitting.

- ✓ Split system
- ✓ Enables installation of pre-assembled cables
- ✓ Easy assembly
- ✓ Conduit remains rotatable
- ✓ Suitable for EW and EWX cable protection conduits

## Flange connection product range

### Type KFW

Splitable 90° flange angle connection with a metric or a Pg thread.

Page 142

### Types KFW/D and KFW/X

Splitable 90° flange angle connection for direct fixing of cable protection conduits.

## m-jumbo conduit connection

## Advantages

### Large connections

The m-jumbo family consists of conduit connections manufactured from high-grade polyamide and are designed for large conduits of sizes NW 70 and NW 95.

The connection has protection rating IP 52. In addition to this the conduit remains rotatable in the fitting.

The protection rating can be easily increased to IP 65 using an additional sealing ring.

The cable protection conduit can be easily fixed to the conduit connection by means of two half shells.

The connections are inherently stable and also provide a high level of tear-out strength.

- ✓ Easy assembly
- ✓ High protection class
- ✓ Conduit remains rotatable in the fitting
- ✓ Straight and 90° versions
- ✓ High tear-out strength

## m-jumbo conduit connection product range

**Type SA-Jumbo  
(flange connection)**

Straight flange connection for jumbo cable protection conduits.

Seal for IP 65 (conduit connection/fitting):												
DS 70	83101238											
DS 95	83101240											

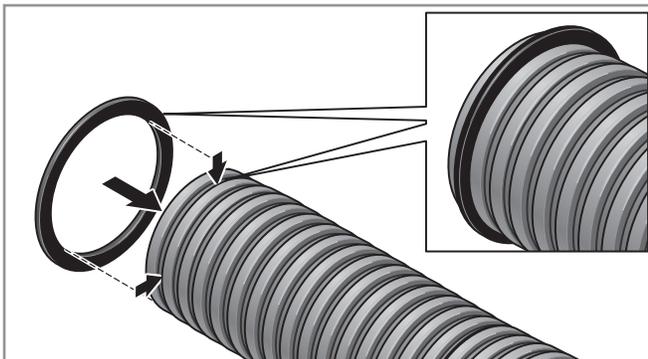

## Assembly

Insert cable protection conduit into fitting. Position and fix half shells onto the fitting. Fit locking mechanisms on both sides.

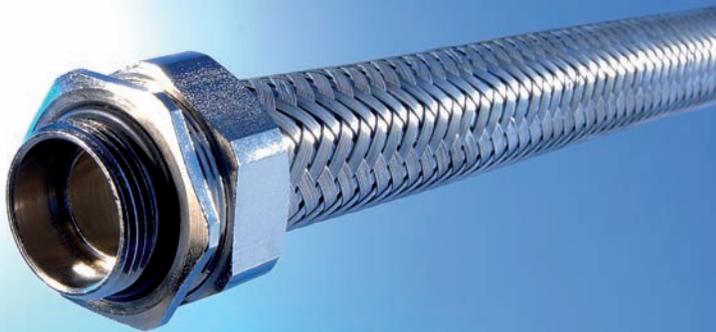

Loosen and remove locking mechanisms on both sides with an appropriate tool. Loosen latching and remove half shells. Remove cable protection conduit from the fitting.

An additional sealing ring is needed on the cable protection conduit to achieve a protection rating of IP 65. To this end pull the seal onto the first recess on the cable protection conduit. Thereafter assemble according to step 1.

## Special fitting

## Advantages

## Special Fittings

The special fittings are special solutions for cable protection conduits encased with metal braiding. For separable corrugated pipes with standard corrugations or closed cable protection conduits.

They are characterised by particular features such as their split design or the discharging of sheath currents.

- ✓ Split version
- ✓ EMC discharge
- ✓ Stable design
- ✓ Individual

## Special fittings product range

**Type EH-EMV**

Metal fitting for the encased cable protection conduit type EW-PAP for discharge of sheath currents.

## Cable protection conduit holders

## Advantages

## Holder systems

The various holder systems are manufactured from high-grade polyamide and polycarbonate.

The new HS family offers the facility to arrange holders in rows as well as stacking them.

A snap-on mechanism enables the actual conduit holders to be combined with a variety of fastening plates (feet). An optional bracket offers additional safety under high tear-out forces.

The proven holders remain in our product range. However, they can easily be substituted by the new HS family. Compatibility is guaranteed.

- ✓ Stackable
- ✓ Arrangable in rows
- ✓ Variable
- ✓ Snap-in conduits
- ✓ Different types

## Cable protection conduit holders product range

**Type HS (conduit holder)**

Conduit holder system made from polyamide, arrangable in rows and stacks. The holder can be screwed on directly.

Page 166

**Type UH**

For fixing cable protection conduits to plants and machines.

Page 169

**Type HS (accessories, fixing foot)**

HS/F fixing foot (as UHF).  
HS/C fixing foot (as KAF).

Page 167

**Type UHG**

For fixing cable protection conduits to plants and machines.

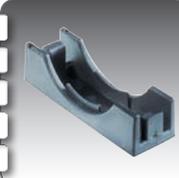

Page 170

**Type HS (accessories, bracket, fixing foot)**

HS/B bracket for HS/U holder for higher tear-out forces HS/S Fixing foot (as USH).

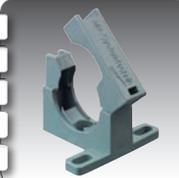

Page 168

**Type BL (clamping bracket for types UH and UHG)**

Optional clamping bracket for UH and UHG.

Page 171

**Type UHF**

For quick and easy connection of control cabinet to door.

Page 172

**Type USH**

For quick and easy connection of control cabinet to door.

Page 173

**Type EF/B**

Holder for rectangular conduit type EF.

# Cable protection conduit holders

## Type UHG

RoHS  
compliant

-40 to 230 °F  
transient 284 °F

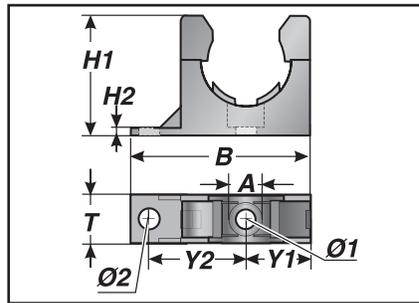

Mod. polyamide

V0

Fixing cable protection conduits to plants and machines.

- The additional plate protects the holder against torsion
- Simply snap in conduits
- Optimum connection of conduit to holder thanks to double grooves in the holder
- Optional BL bracket for applications with high stresses

UHG

Type	Order no.	Color	Suitable for Murrflex	A inch	B inch	H1/2 inch	T inch	Y1/2 inch	Ø 1/2 inch	Pack qty.
------	-----------	-------	-----------------------	--------	--------	-----------	--------	-----------	------------	-----------

suitable for Murrflex EW and EWX

## Type BL (clamping bracket for types UH and UHG)

RoHS  
compliant

 -104 to 230 °F  
transient 284 °F

 Mod. polyamide

 V0

Optional bracket for UH and UHG.

- Additional mechanical retention of conduit when exposed to high stresses

# Cable protection conduit holders

## Type UHF

RoHS compliant

-40 to 230 °F  
transient 284 °F

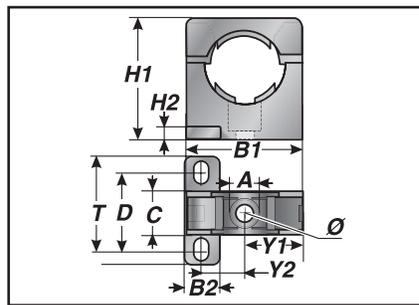

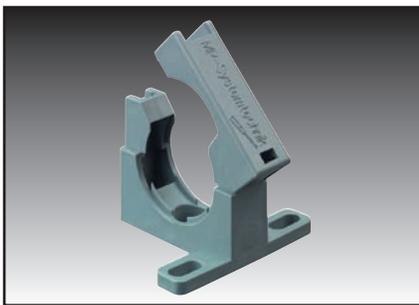

Mod. polyamide

V0

Quick and easy connection of control cabinet to door.

- Various fastening possibilities
- Fixing holes fit horizontal and vertical bar system in the control cabinet
- Conduits can still be rotated
- Pre-assembly of lower part possible
- High tensile strength thanks to double webs
- Brackets included in delivery

UHF

**Protectors**  
**Conduit coupling**  
**Conduit distributor**

## Advantages

## Distribute, merge and extend

Conduit distributor, conduit coupling and protectors are made of high-quality polyamine and thermoplastic elastomer.

The large choice of distributors means a huge number of possible combinations and ways of splitting cable protection conduits.

Different protection ratings from IP 40 to IP 67 ensure an extensive range of applications.

The SVG type enables cable protection conduits of the same size to be connected together. Thus, any cable protection conduit can be extended however far you want.

The PR/SV protectors ensure that the cable protection conduits do not suffer from impact or abrasion. Additionally, cable protection conduits can be connected for repair work.

- ✓ Huge variety of types
- ✓ Different materials
- ✓ Different protection ratings
- ✓ Split version
- ✓ Easy installation

## Protectors / conduit couplings / conduit distributors product range

### Type PR/SV

Protector as strike guard and conduit coupling. Cable protection conduits are protected against impact and abrasion.

Page 180

### Type SVG

For the extension and repair of cable protection conduits.

Page 182

### Type VT

T distributor for cable protection conduits with different diameters.

Page 185

### Type SVY

Y distributor for cable protection conduits with different diameters.

Page 184

### Type YPA-F

Y distributor made from polyamide for cable protection conduits with high protection rating.

Page 185

### Type YTPE-F

Y distributor made from thermoplastic elastomer for cable protection conduits with a high protection rating.

Page 186

# Protectors / conduit couplings / conduit distributors

## Type PR/SV

RoHS  
compliant

-40 to 230 °F  
transient 284 °F

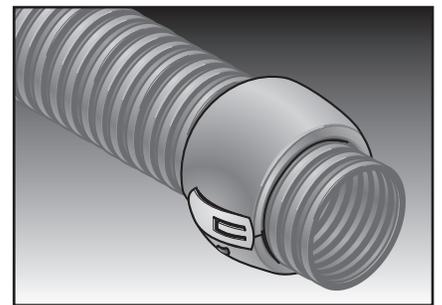

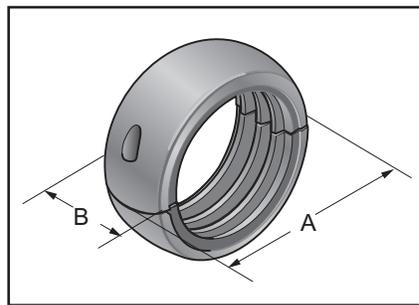

Mod. polyamide

VO

Protector as strike guard and conduit coupling. Cable protection conduits are protected against impact and abrasion. If required, cable protection conduits can also be connected.

- Flat construction method
- Simple assembly with a sliding lock, without the need for tools
- Optional stop screw (included in delivery)

## Cable fittings product range

### Type WKK (plastic version)

Cable fittings with very good strain relief and vibration-resistant lockable cap nut. Combinable with multi-insert KV-ME.

Page 190

### Type WKK-Ex (plastic version)

Cable fittings with very good strain relief for areas at risk of explosion. High protection class and large clamping range.

Page 192

### Type WKM (metal version)

Cable fittings with very good strain relief and vibration-resistant lockable cap nut. Combinable with multi-insert KV-ME.

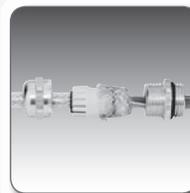

Page 194

### Type MWKM (metal version with multi-insert)

The MWKM is a metal cable fitting with multi-insert that enables several cables to be routed through one cable fitting.

Page 195

### Type WKM-EMV (metal version)

Shielded cables can be connected to earth potential using this cable fitting. Large clamping area.

Page 196

### Type KV-ME (multi-insert)

Enables several cables to be routed through one fitting. The fitted seal insert in the cable fitting is simply swapped for the KV-ME multi-insert.

Page 197

## Type WKK (plastic version)

RoHS  
compliant

-40 to 212 °F  
transient 248 °F

Mod. polyamide  
Moulded seal: NBR

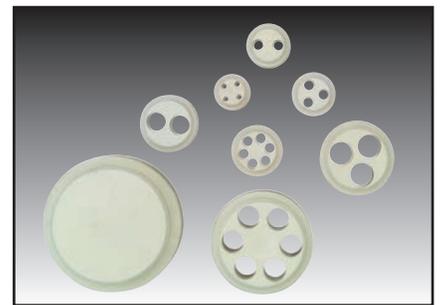

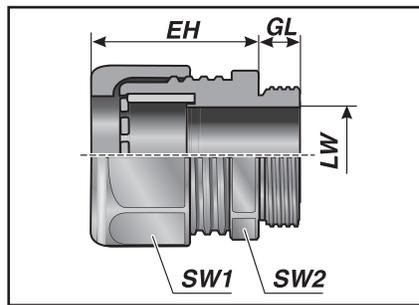

V0

IP 68 up to 10 bar  
with additional O-ring, type OR

The cable fitting offers excellent strain relief and has a vibration-resistant cap nut. The multi-insert KV-ME enables several cables to be routed through one cable fitting.

- Very high protection class
- Easy to assemble
- Large clamping range
- An additional O-ring (type OR) is required in order to assure a protection rating of IP 68

## Type WKK-Ex (plastic version)

RoHS  
compliant

-4 to 221 °F

Mod. polyamide  
Moulded seal: NBR

V0

IP 68 up to 10 bar  
with additional O-ring, type OR

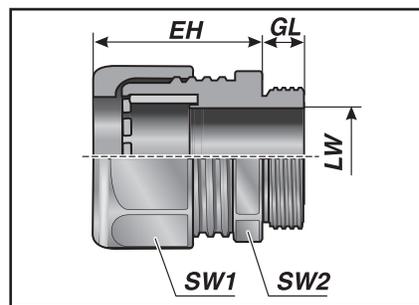

Ex class EEx e II PTB  
Ex class EEx e II KEMA

Cable fitting with high protection class for areas at risk of explosion.

The cable fitting offers excellent strain relief and has a vibration-resistant cap nut.

- Very high protection class
- Approved for areas at risk of explosion
- Large clamping range
- An additional O-ring (type OR) is required in order to reach a protection rating of IP 68

## Type WKM (metal version)

RoHS  
compliant

-  -40 to 212 °F  
transient 248 °F
-  Brass, nickel-plated  
mod. polyamide; NBR
-  IP 68 up to 10 bar

The cable fitting offers excellent strain relief and has a vibration-resistant cap nut. The multi-insert KV-ME enables several cables to be routed through one cable fitting.

- Very high protection class
- Easy to assemble
- Large clamping range
- Includes sealing ring on connecting thread

## Type WKM-EMV (metal version)

RoHS compliant

-40 to 212 °F  
transient 248 °F

Brass, nickel-plated  
mod. polyamide; NBR

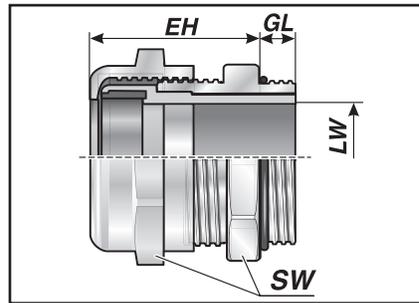

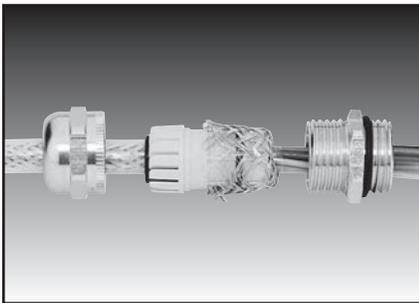

IP 68 up to 10 bar

Moulded seal and  
O-Ring: NBR

Shielded cables can be connected to earth potential using this cable fitting. The cable's braiding makes contact with the metal body. This enables sheath currents to be discharged.

- Simple contacting
- Large clamping range
- Easy handling
- Includes sealing ring on connecting thread

## Type KV-ME (multi-insert)

RoHS  
compliant

 -40 to 212 °F  
transient 248 °F

 Elastomer

 IP 65

The KV-ME multi-insert can be used both in WKK cable fittings and in WKM cable fittings. This enables several cables to be routed through one fitting. The fitted seal insert in the cable fitting is simply swapped for the KV-ME multi-insert.

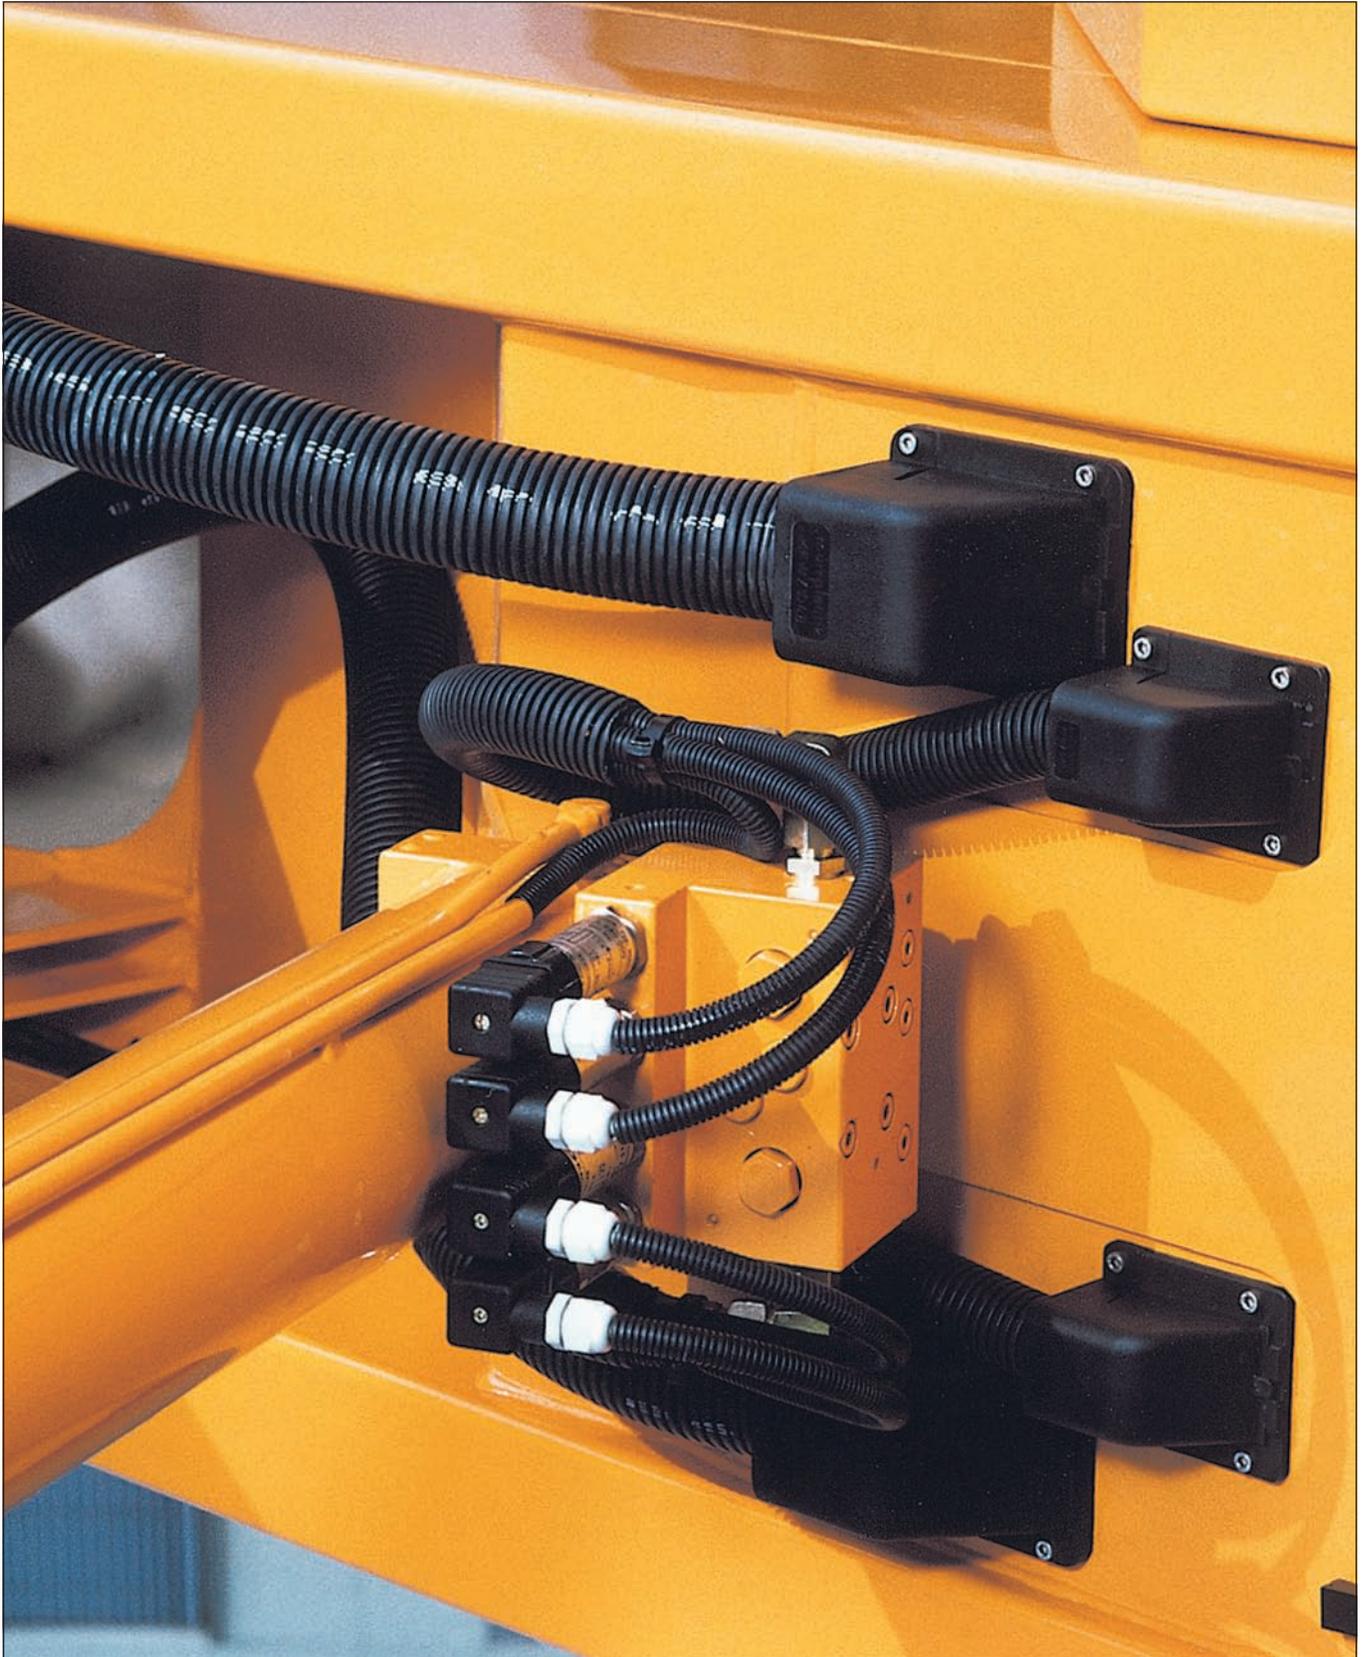

The cable diameter may be up to 20% less than the diameter of the hole, but must not undershoot the hole diameter by less than 0.04 inches.

- Variable
- More cables through one fitting
- High protection class

# Accessories

## Accessories product range

### Type SB/SBF (spiral tape)

Spiral tapes are used to bundle cable harnesses efficiently and simply. The spiral tapes also protect the insulation of the wires.

Page 222

### Type BN (fixing rivets)

Plastic expansion rivets for the quick installation of components, e.g. cable ducts.

Page 223

### Type KB/KBM (cable ties)

Cable ties are a reliable method for the economic bundling and fastening of cables. Metal cable ties KBM for EMV solutions.

Page 224

### Type BF (cable tie)

Cable tie with title block. For use with ink pens or permanent waterproof markers.

Page 226

### Type SH (screwed holders)

The SH screw-down holder is used to fix individual cables using screw or rivets cost-effectively.

Page 227

### Type OR-NBR (O-ring)

O-ring for sealing threaded connections resulting in higher protection ratings, e.g. on cable fittings.

Page 216

### Type KH (screwed and adhesive holders)

Adhesive holder, plastic. The retention force can be increased by additional fastening with a screw.

Page 228

### Type ET (end sleeve)

The open end of a conduit can be closed using the end sleeve and protruding cables can be centered.

Page 217

### Type KBL (cable tie rail)

Quick and easy fitting of cables. Cable ties may be pushed on if a rail is already fitted.

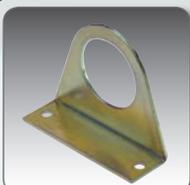

Page 229

**Type KAW (plastic connection angle)**

The KAW 90° plastic connection angle is a foldable angle connector. Combinable with cable or conduit fittings.

Page 218

**Type BWM (angle bracket)**

Universal holder for fastening fittings to equipment and machinery.

Page 219

**Type SS (conduit clamp)**

Conduit clamps for easy attachment of conduits from our conduit product range.

Page 220

**Type SSG (conduit clamp)**

Metal conduit clamp with halogen-free elastomer coating.

Page 221

**Type KGM (plastic locknut)**

Plastic locknut made from self-extinguishing polyamide with metric or Pg thread.

Page 204

**Type GM (metal locknut)**

Lock nut made of metal with metric or Pg thread.

Page 206

**Type BSTK (plastic dummy plug)**

Dummy plug made of plastic with metric or Pg thread. IP 65 protection rating is achieved using additional O-ring type OR.

Page 207

**Type BST (metal dummy plug)**

Dummy plug made of metal with metric or Pg thread. IP 65 protection rating is achieved using additional O-ring type OR.

Page 209

**Type KRR (plastic reducing bush)**

Thread reducing bush made of plastic with metric or Pg thread.

Page 210

**Type RR (metal reducing bush)**

Thread reducing bush made of metal with metric or Pg thread. Knurled or hexagon version, depending on type.

Page 212

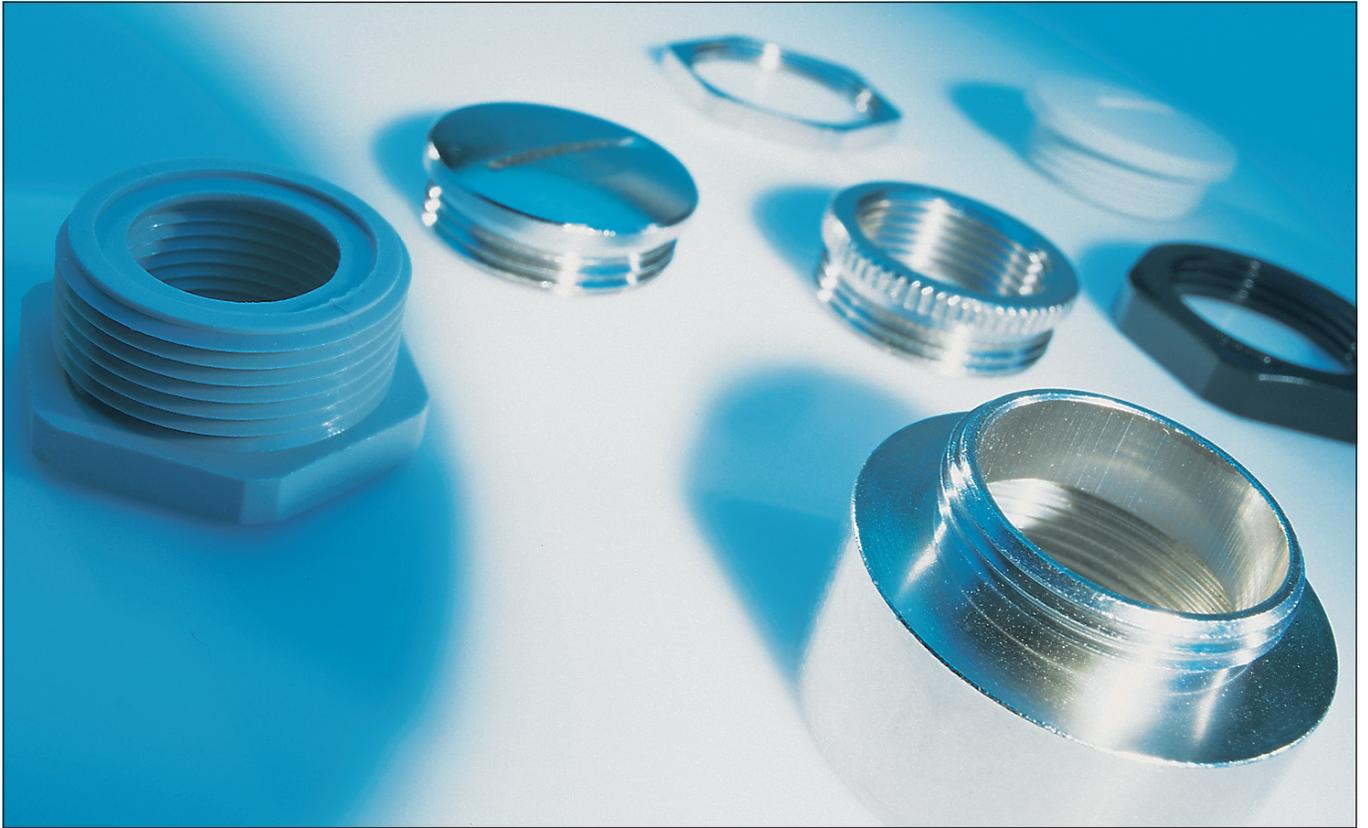

**Type ER/EG (metal extension)**

Thread extension made of metal with metric or Pg thread. Round or hexagonal version, depending on type.

Page 214

## Advantages

### Without accessories nothing works

A comprehensive range of accessories is available, including locknuts, reducing bushes, various fasteners, cable ties, etc.

Different materials, thread types and thread sizes ensure a wide range of uses for many applications.

- ✓ Large range of accessories
- ✓ Different materials
- ✓ Various thread types and sizes
- ✓ Universal
- ✓ Easy handling

## Type RR (metal reducing bush)

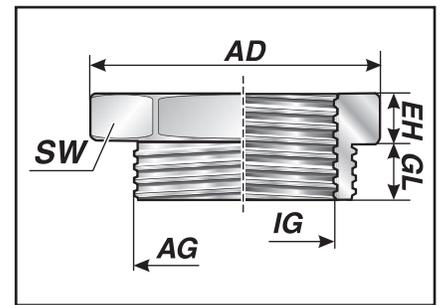

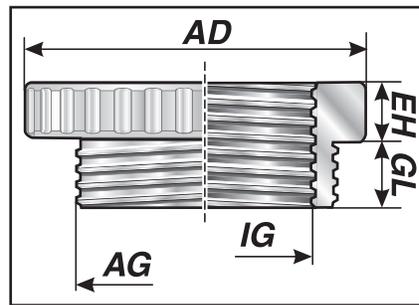

RoHS  
compliant

Brass, nickel-plated

Thread reducing bush made of metal with metric or Pg thread.  
Knurled or hexagon version, depending on type.

- Metric/metric
- Metric/Pg
- Pg/Pg

## Type ER/EG (metal extension)

RoHS compliant

Brass, nickel-plated

Thread extension made of metal with metric or Pg thread.

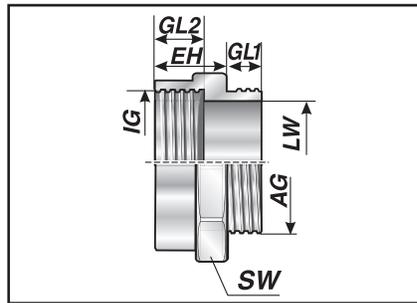

Round or hexagon version, depending on type.

Some with O-ring on external thread.

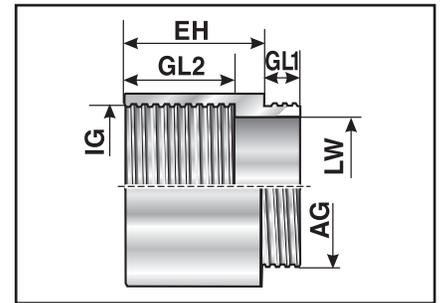

- Metric/metric
- Metric/Pg
- Pg/Pg

## Type KAW (plastic connection angle)

RoHS  
compliant

-4 to 176 °C

Mod. polyamide  
NBR

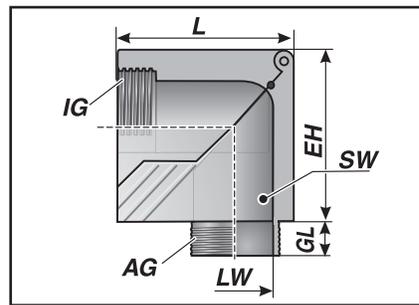

VO

IP 68

The KAW 90° plastic connection angle is a foldable angle connector. It can be combined freely with cable or conduit fittings.

- Easy cable insertion
- High protection rating IP 68
- Easy assembly
- Folds open
- Wide range of connection options
- Includes seal on connecting thread

## Spiral tape, type SB/SBF

-76 to 185 °F

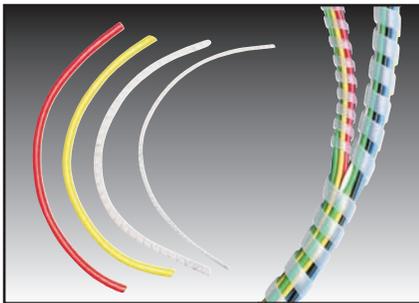

Mod. polyethylene

V0 only type SBF

Spiral tapes are used to bundle cable harnesses efficiently and simply. The spiral tapes also protect the insulation of the wires. Branches of single wires or looms of cables may be made at any place. Bundling in the range from 0.08–3.94 inches (2–100 mm) is possible with just three sizes.

The SBF consists of flame-retardant material.

## Type KB/KBM (cable ties)

natural colors: -13 to 185 °F  
black: -40 to 221 °C

KB: Polyamide 6.6  
KBM: Stainless steel 1.4301

KB black: V0  
KKB: V0

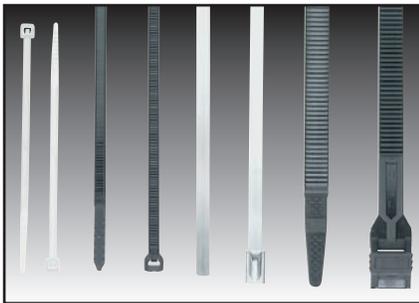

Cable ties in black  
are UV stabilized

Cable ties are a reliable method for the economic bundling and fastening of cables, cable harnesses, tubes, conduits and other components.

The black cable ties are suitable for outdoor applications.

The cable tie KKB 28 is equipped with a special locking mechanism and is especially suitable for heavy-duty applications.

The KBM metal cable tie is ideally used for EMC solutions. It creates greater contact surface area for discharging sheath currents.

# Tools

## Tools product range

**Type KS**  
(Cable shears)

Sturdy version of cable shears. Suitable for removing cable sheathing and braided shields.

Page 236

**Type KM**  
(Cable stripping knife)

Special cable stripping knife for stripping of wiring.

Page 237

**Type UAZ**  
(Stripping tongs)

Stripping tongs for single wires up to a diameter of 2.5 mm<sup>2</sup> (AWG 13). A slider is used to adjust the stripping length.

Page 238

**Type KBW/KKBW**  
(Cable tie tools for plastic cable ties)

Tools for mounting of plastic cable ties. With manual cutting mechanism or automatic cutting mechanism.

Page 240

**Type KBW/M**  
(Cable tie tool for metal ties)

Cable tie tools intended for metal cable ties of type KBM, robust tool made of metal with a manual cutting mechanism.

Page 241

**Type KE**  
(Cable insertion tool)

Easy insertion of cables into split and slit cable protection conduits.

Page 234

**Type BNW**  
(Riveting tool)

Only this tool brings out the full economical effect of the BN fixing rivet. The tools are matched to the size of the rivets.

Page 235

**Type CrimmBoss**  
(Crimping tool for cable end sleeves)

Electromagnetic tool for crimping insulated cable end sleeves complete with accessories.

Page 239

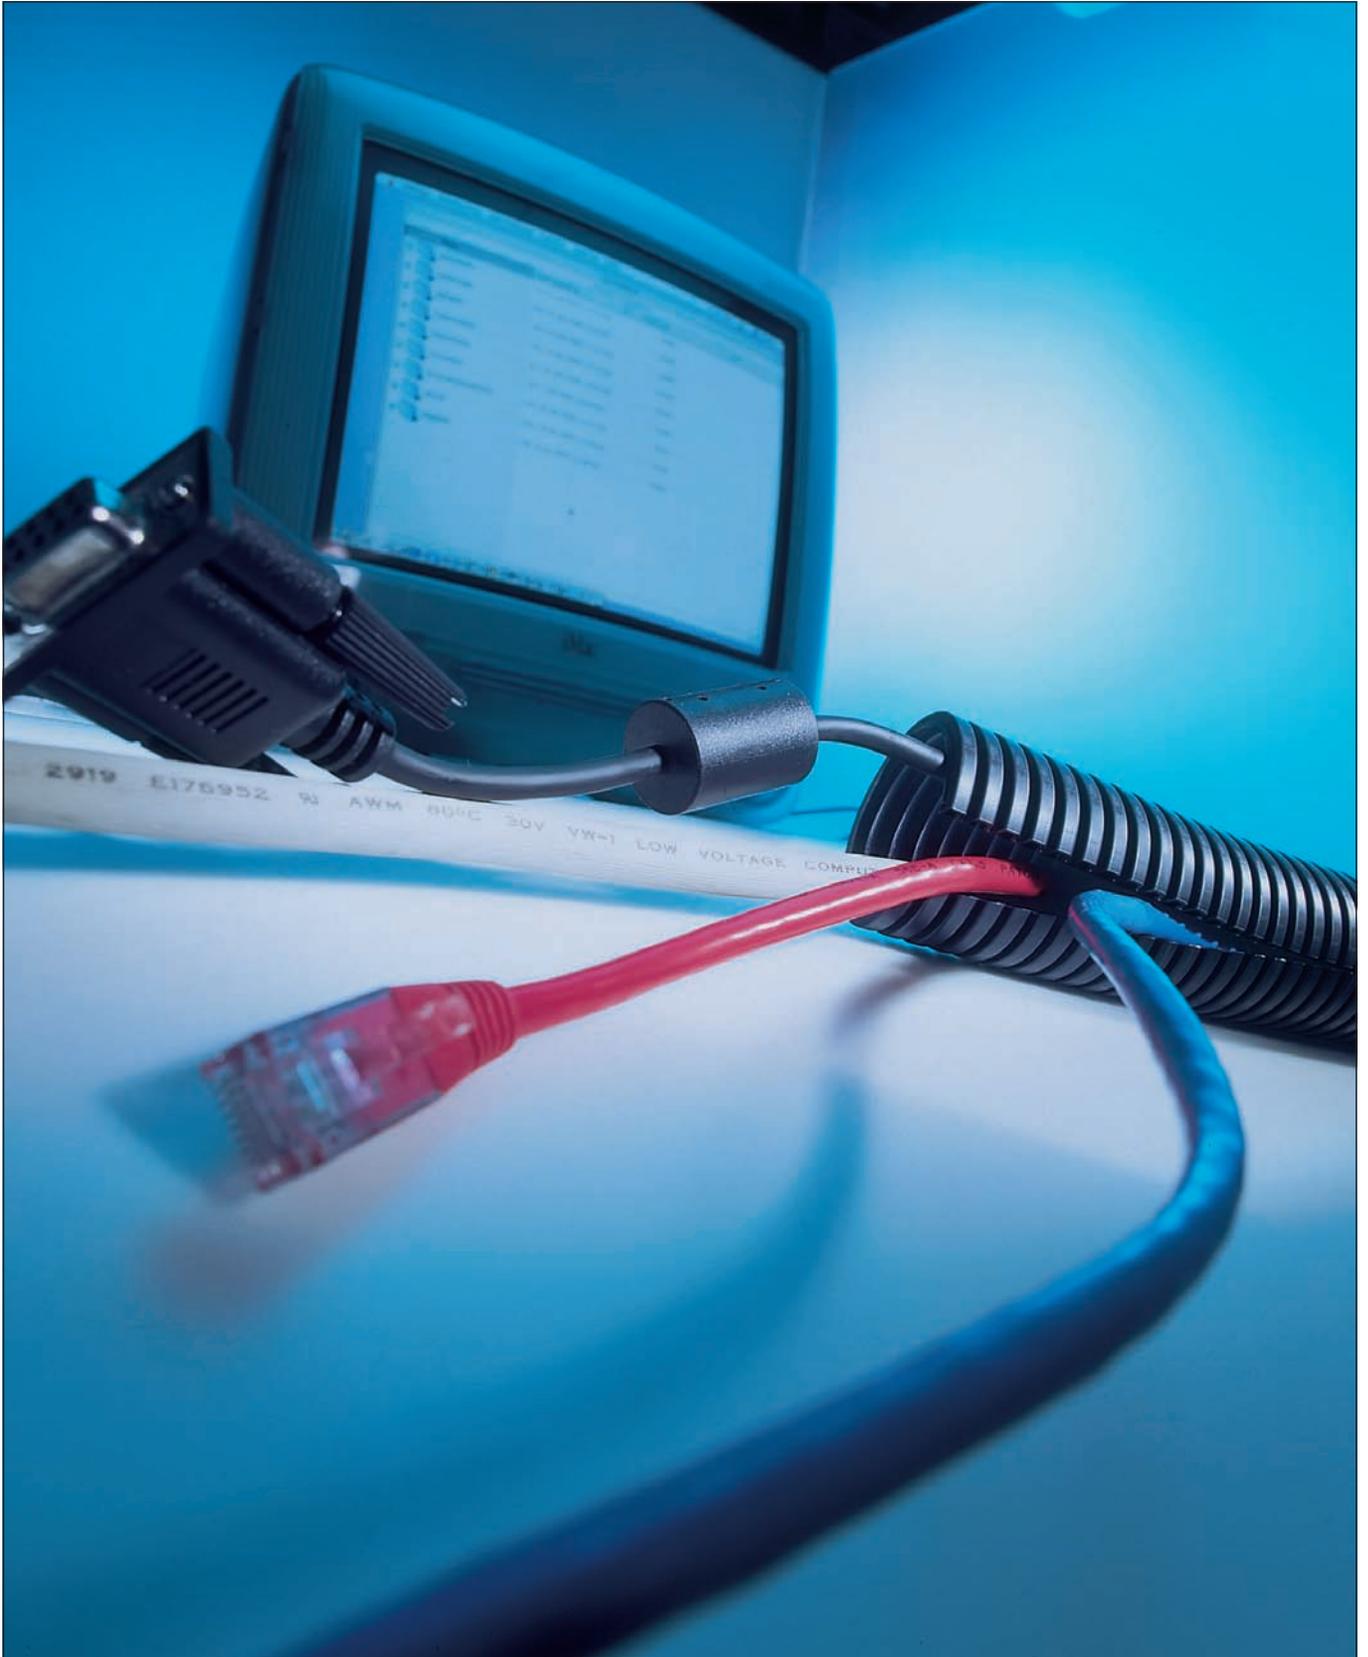

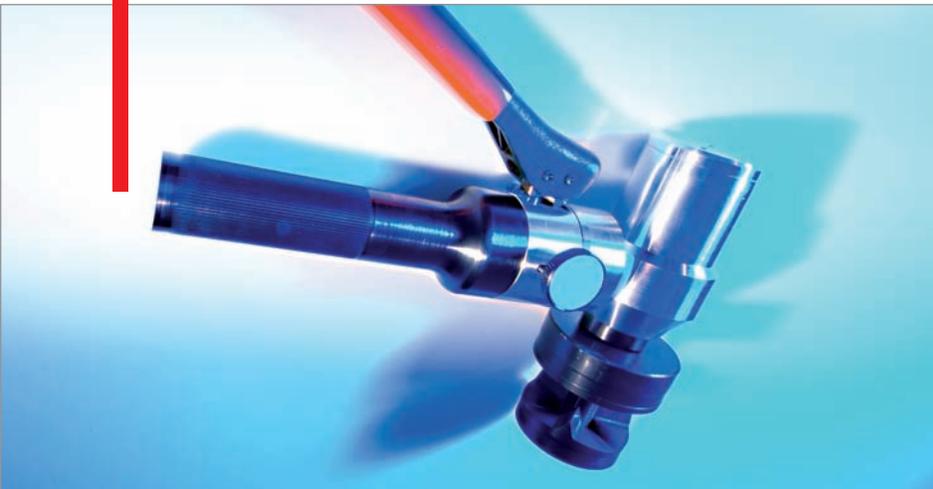

## Punching tools

## Advantages

## Punching tools

For years, Murrplastik Systemtechnik has been developing easy-to-assemble, maintenance-free connection systems for the routing of lines and cables.

Thanks to our practical punching tools, you now have the option of quickly and easily implementing the appropriate control cabinet cut-outs for our conduit and cable fittings, cable entry panels KDP and cable entry systems KDL and KDL/E.

You can choose between three different hydraulic punches and a wide range of punching tools.

Punching tools are available for sheet steel and for stainless steel applications.

- ✓ Compact construction
- ✓ For workshop and assembly
- ✓ Long service life
- ✓ Easy handling
- ✓ Compatible with many other systems

## Punching tool product range

**Type SW-WR / SW-WQ**  
(Punching tools rectangular / square)

Several punching tools for the creation of square or rectangular cut-outs.

Page 248

**Type SW-WE**  
(Punching tools round)

Round hole punch, individual tools for steel or stainless steel plates.

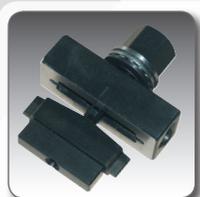

Page 250

**Type SW-WS**  
(Set of punching tools)

Round hole perforator tool sets from M16 to M40 and/or to M63.

Page 252

**Type SW-WD**  
(Punching tools SUB-MIN-D)

Punching tool for creation of SUB-MIN-D plug cut-outs (9 to 50 poles).

Page 253

**Type SW-ASN**  
(Special nibbling tool)

Universal punching tool for creation of various cut-out sizes and shapes.

Page 254

**Spare part for punching tools**

Replacement parts for the entire punching tool system.

Page 255

**Type SW-HG and SW-HW**  
(Hydraulic hand punch)

Practical manual punch without additional conduit and cylinder, ideal for workshop and assembly.

Page 246

**Type SW-HF**  
(Hydraulic punch with foot pump)

Practical hydraulic punch with foot pump; ideal for use in the workshop. Both hands remain free for exact positioning and punching.

Page 247

## Type SW-HG und SW-HW (hydraulic manual punch)

Practical manual punch without additional conduit and cylinder, ideal for workshop and assembly.

- Hydraulic punch made of high-strength aluminum
- Overload protection provided by excess pressure valve
- Ergonomic handle, springs back automatically

SW-HW version:

- The angle head can be pivoted 360° for better handling.

SW-HG

SW-HW

Type	Order no.	Weight lbs (kg)	Punching force kN	Operating pressure psi (bar)	Pack qty.
Compact hydraulic manual punch, straight					
SW-HG hydraulic manual punch	87801010	3.5 (1.6)	75	9,400 (650)	1
Compact hydraulic manual punch with pivoting head					
SW-HW hydraulic manual angle punch	87801012	4.1 (1.9)	75	9,400 (650)	1
consisting of:					
1 pce compact hydraulic manual punch					
1 pce tension bolt version A					
1 pce tension bolt version C					
1 pce spacer bushing set (3-pce.)					
1 pce tap drill 0.43 inches (11 mm)					
1 pce transport case					
Punching performance, round hole perforator:					
0.08 inch (2.0 mm) sheet steel (St37) max. Ø 3.3 inches (84 mm)					
0.12 inch (3.0 mm) sheet steel (St37) max. Ø 2.5 inches (64 mm)					
0.08 inch (2.0 mm) stainless steel (V2A) Ø 3.3 inches (84 mm)					
Punching performance, square hole perforator:					
0.08 inch (2.0 mm) sheet steel (St37) max. 1.4 x 4.4 inches (36 x 112 mm)					
Spare part see chapter "Spare part for punching tool"					

## Type SW-HF (Hydraulic punch with foot pump)

Practical hydraulic punch with foot pump; ideal for use in the workshop.

The foot pump does not require use of the hands, leaving both hands free for exact positioning and punching at the control cabinet.

The support frame of the foot pump is splayed. This provides for stable, anti-tip working.

- Overload protection via installed pump safety valve
- Better punching performance then with a manual punch
- For larger punching tools

SW-HF

Type	Order no.	Weight lbs (kg)	Punching force kN	Operating pressure psi (bar)	Pack qty.
Hydraulic punch with foot pump					
SW-HF Hydraulic punch with foot pump	87801014	30.7 lbs (13.9)	100	10,150 (700)	1
consisting of:					
1 pce hydraulic cylinder with quick coupling					
1 pce Hydraulic conduit 9.19 inches (2.8 m)					
1 pce tension bolt version A					
1 pce tension bolt version C					
1 pce spacer bushing set (5-pce.)					
1 pce tap drill 0.43 inches (11 mm)					
1 pce sheet steel transport case					
Punching performance, round hole perforator:					
0.08 inch (2.0 mm) sheet steel (St37) max. Ø 5.9 inches (150 mm)					
0.12 inch (3.0 mm) sheet steel (St37) max. Ø 3.9 inches (100 mm)					
0.12 inch (3.0 mm) sheet steel (V2A) max. Ø 3.9 inches (100 mm)					
Punching performance, square hole perforator:					
0.08 inch (2.0 mm) sheet steel (St37) max. 5.4 x 5.4 inches (138 x 138 mm)					
0.08 inch (2.0 mm) sheet steel (V2A) max. 3.6 x 3.6 inches (92 x 92 mm)					
Spare part see chapter "Spare part for punching tool".					

## Type SW-WR / SW-WQ (Punching tool rectangular / square)

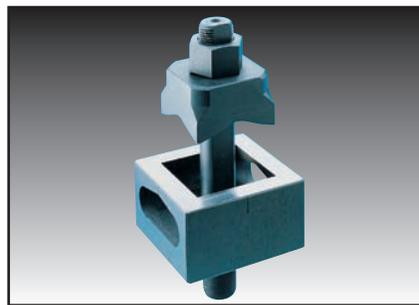

Steel

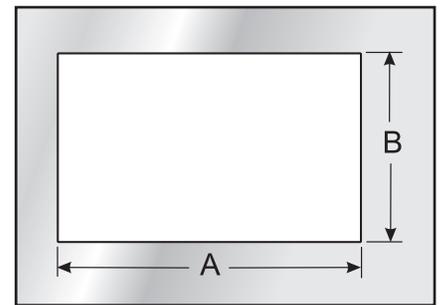

Several punching tools for the creation of square or rectangular cut-outs. These hole punches are delivered a plastic transport case. Also ideal for mounting use. Corresponding tension bolt is included in the delivery. During the punching process, the attachment points for the screw holes are centred.

## Operating manual punching tool

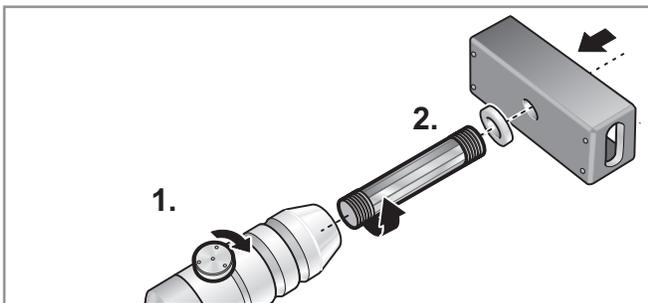

Establish and mark cut-outs.

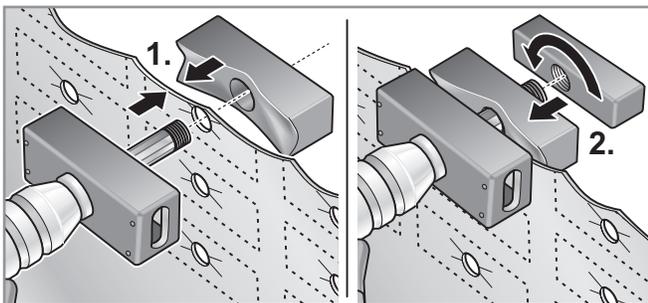

Caution:

Ensure sufficient distance between the press cuts!

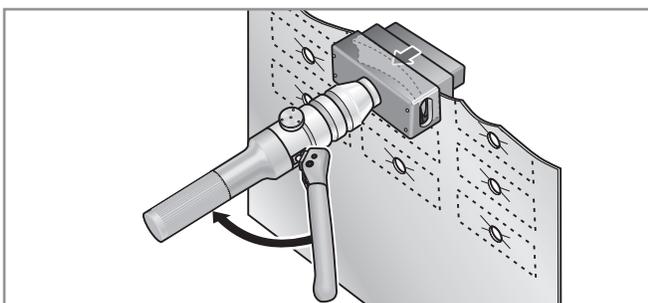

Mark drilling point for the pilot hole for the tension screw and punch out the pilot hole for the tension screw.

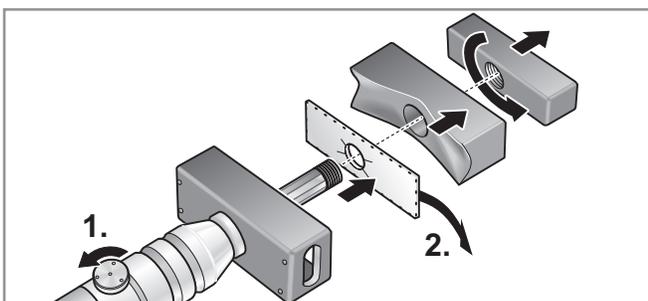

Screw in corresponding tension screw into the tool head and close the valve on the punching tool. Push on appropriate spacer and die.

Insert tension screw into pilot hole. Stick or screw stamp onto tension bolt. Secure with lock nut where needed. Align die and draw in lock nut by hand.

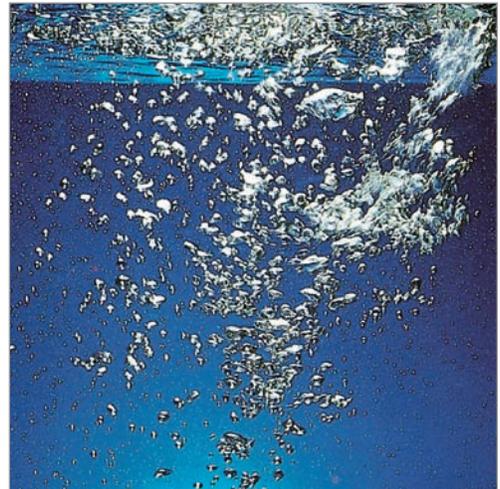

Activate hydraulic mechanism until the press cut is completed. Then actuate 3-4 further strokes. This ensures an easier removal of the plate from the die. Caution: If excessive force is required, inspect the hydraulic tool and punching tool! Observe the tool's operating instructions.

Remove hydraulic tool from the cut-out. Open valve and remove lock nut and stamp. Remove plate from the die.

# Appendix

## Protection classes according to DIN EN 60529

An important element for housings is protection of integrated elements against drilling, foreign particles and water. The different protective abilities are classified into IP protection ratings (IP = International Protection). The framework conditions that a protection class must guarantee are laid out in DIN 40050 and IEC-EN 60529.

IP protection classes are indicated through a two digit code (IPXX). The first digit indicates protection against contact and foreign particles, the second the water protection factor. Class IP 65 is therefore completely protected against touching, is dust-proof (first digit = 6) and protected in all directions against water jets from a nozzle (second digit = 5).

First index no.	Touch-proof	Foreign particle protection	Second index no.	Brief description	Water protection
0	Unprotected		0	Unprotected	
1	Protected against solid foreign objects of 2 inches (50 mm) and larger	The object probe, a sphere of 2 inches (50 mm) in diameter, must not fully penetrate. 	1	Protected against vertically falling drops of water	Drops which fall vertically must not have any harmful effect. 
2	Protected against solid foreign objects of 0.49 inches (12.5 mm) and larger	The object probe, a sphere of 0.49 inches (12.5 mm) in diameter, must not fully penetrate. 	2	Protection against water falling at an incline (up to 15°)	Drops which fall vertically must not have any harmful effects if the housing is inclined at an angle of up to 15° of either side of the perpendicular. 
3	Protected against solid foreign objects of 0.1 inches (2.5 mm) and larger	The object probe, 0.1 inches (2.5 mm) in diameter, must not penetrate at all. 	3	Protection against spray falling at an incline (up to 60°)	Water which is sprayed at an angle of up to 60° of either side of the perpendicular must not have any harmful effects. 
4	Protected against solid foreign objects 0.04 inches (1.0 mm) in diameter and larger	The object probe, 0.04 inches (1.0 mm) in diameter, must not penetrate at all. 	4	Protection against general spray	Water which is splashed against the housing from all directions must not have any harmful effects. 
5	Dustproof	The penetration of dust is not fully prevented; however, it shall not penetrate to such an extent that satisfactory operation or safety are detracted. 	5	Protection against water jets (nozzles)	Water which is sprayed in a jet against the housing from any direction must not have any harmful effects. 
6	Dust-tight	No penetration of dust. 	6	Protected against strong water jets (overflow)	Water which is sprayed as a strong jet against the housing from any direction must not have any harmful effects. 
			7	Protected against the effect of temporary submersion in water	Water must not penetrate to an extent that will cause harmful effects if the housing is temporarily submerged in water under pressure and under time conditions. 
			8	Protected against the effect of temporary submersion in water	Water must not penetrate to such an extent that it will cause harmful effects if the housing is permanently submerged in water. 
			9 k	Protection against water during high-pressure or steam jet cleaning	IP x9K according to DIN 40050 Water jet at 0°, 30°, 60° and 90° Cycle: 30 seconds each Distance: 0.39–0.59 inches (10-15 cm) Water volume: 3.7–4.3 gallons/minute Water temperature: 176 °F +/- 41 °F Water pressure: 80 - 100 psi 

## Description of fire classifications according to UL 94

### Fire classification HB

The material burns slowly in the horizontal combustion test. The rate of combustion must not exceed 3 inches/min. for wall thicknesses of up to 0.12 inches (3 mm), and 1.5 inches/min. for wall thicknesses over 0.12 inches (3 mm). Any materials exceeding these combustion rate limits are not registered by UL.

### Fire classification V2

In the vertical combustion test, self-extinguishing must occur after an average of 25 seconds (individual values not to exceed 30 seconds). Any dripping material may ignite cotton wool located underneath. However, any afterglow must not exceed 60 seconds.

### Fire classification V1

In the vertical combustion test, self-extinguishing must also occur after an average of 25 seconds (individual values not to exceed 30 seconds). However, any material dropping off must not ignite cotton wool placed underneath. Any afterglow must not exceed 30 seconds.

### Fire classification V0

In the vertical combustion test, self-extinguishing must occur after an average of less than 5 seconds (individual values not to exceed 10 seconds). Any material dropping off must not ignite cotton wool placed underneath and any afterglow must not exceed 30 seconds.

## Description of fire classification according to DIN 5510

### Combustion class S4

**Test procedure:** as per DIN 54 837

#### Requirements:

- Length of the destroyed area:  $\leq 7.87$  inches (20 cm)
- No afterburning

Products may also be assigned to combustion class S4 if afterburning occurs within the burnt testing area and the average duration of afterburning does not exceed 10 seconds. If afterburning occurs in the undamaged area of the test piece, the product must not be assigned to combustion class S4.

**If the afterburning of a test object lasts longer 120 seconds, such products must not be assigned to combustion class S4 (note: according to DIN 54 837, a burning test piece must be extinguished immediately after an observation period of 120 seconds).**

All information with respect to the chemical and physical properties of Murrplastik products as well as application advice given verbally, in writing or by tests, is given to the best of our knowledge.

It does not exempt the purchaser from the duty to carry out inspections and tests to determine the exact suitability of the products for the intended use.

The purchaser is solely liable for the application, use, and installation of the products. He must also comply with the legal and official provisions, and observe any possible property rights of third parties.

Our General Terms and Conditions shall apply.

Subject to technical alterations.

## Specifications

**Temperature range**

**Material**

**Fire classification**

**Crush resistance**

**Protection class**

**Additional information  
for use and processing**

At the back you will find information  
on markings and approvals.  
Please open out if necessary.

## Approvals/Explanations

**CE**  
Products conforms to EU directives

**UR**  
Product is UR/UL listed

**CSA**  
Approved for the Canadian market

**VDE**  
VDE certified product

**Ex**  
Product can be used in areas at risk of explosion

**DB**  
Certified for German railway engineering

**BS**  
Certified for British railway engineering

**SNCF**  
Certified for French railway engineering

**Robot/handling systems**  
Product suitable for permanent movement

**FAR**  
Approved for aerodynamic engineering

**ABD**  
Approved for aerodynamic engineering
